Great Song Writer

In his 31 years of life, Schubert wrote 603 songs.

Big Russian Increase

Russia's rate of increase in population by births is three times that of the United States, nearly nine times that of England and Wales and more than four times Scotland's. Among 40 nations, only three surpass Russia. They are Formosa, with a percentage increase on 1,000 births of 24.8; Mexico with 20.5, and Puerto Rico with 19.8. Russia's rate is 18.6.

Oil That Lubricates

The ability of an oil to lubricate has little relation to its viscosity, but is rather determined by the chemical structure and composition. If the clearance between moving parts is close and a heavy oil is used the friction may be great enough to heat the oil and thereby make it thinner; but its lubricating properties are still just as good as before.

U. S. Hospital Facilities

New York leads all states in the bed capacity of hospitals, having 221,960 beds. California places second and Illinois is in third place. One patient is admitted to the hospitals in the United States every two seconds.

'Gingerbread' Outmoded

Wide cornice overhangs are out of date, and houses without them cost less. The same is true of most "gingerbread" which formerly was used as architectural decoration. Simple lines are best.

First Ground Axes

First axes to be ground and polished before sold were manufactured in 1826 in Collinsville, Conn., by David S. Collins with his brother and cousin. Before that time axes were made by blacksmiths and sold unground.

Oil Put to Work

This country's annual oil output can do the work of 4 1/2 billion men toiling eight hours a day, six days a week. That is to say, it provides the equivalent of 32 able-bodied servants for each person in the United States.

Pays to Operate Moderately

Equipment used at moderate rates of operation always will last longer, give less trouble and save in energy consumption. Operate your refrigerator more at lower settings of the cold control. Do more cooking with the lower heats on burners. Don't try to hurry the washing by overloading the machine. Turn off light and heating appliances immediately when through using them. Fire your furnace moderately and maintain an even temperature in the house. Be conscious of moderation and avoid the dash-and-tear way of doing things.
