Mostly About Frogs There are frogs that live both in and out of the water; some that live only in the water, and still others that never leave the land, depending on rainfall for their necessary moisture. Certain frogs, equipped with spade-shaped feet, lead an almost hermit life, burrowing into the ground like moles. The "flying frog" of Borneo leaps spectacularly from tree to tree. One tropical frog lays its eggs in the rain-filled crevices of tall palms, sometimes 60 or more feet high. Another carefully builds a circular wall of mud in a stream or pond, enclosing a sheltered nursery where the young can hatch.

No More Fear of Choking, Gasping Asthma Spasms Scores of Burlington citizens are free from fear of attacks of Asthma since the famous physician's prescription, known as B. T. Formula has been made available to the public. B. T. Formula is a liquid medicine which, if taken regularly, lessens and delays the attacks of bronchospasms to the point of bringing asthma sufferers almost complete relief. From this dreaded occurrence, B. T. Formula enters the blood stream and reaches the bronchial tubes, both large and small, loosening the phlegm that brings on the choking and loss of breath you have experienced. Send \$5.00—check or money order to B. T. Formula Co., 1209 Burlington Ave., Burlingame, Calif.—Your B. T. Formula will be mailed postpaid—satisfaction guaranteed or money cheerfully refunded.
