SUPPLY OF LIVE STOCK INCREASES

For the first time in many years, the farmers of the state have reason to expect a marked increase in the supply of live stock. The reasons for this are easy to understand. The prices of live stock have been high, and the demand for meat has been considerable. The result has been an increased supply of live stock, which is now being brought to market.

The increased supply of live stock is a matter of great importance, as it will have a direct influence on the prices of meat and other foodstuffs. The increased supply of live stock will also have a beneficial effect on the economy of the state, as it will create employment and increase the incomes of farmers.

The increased supply of live stock is also a matter of great importance to the nation, as it will have a beneficial effect on the economy of the nation. The increased supply of live stock will also have a beneficial effect on the economy of the world, as it will create employment and increase the incomes of farmers.
