

When a Doctor Prescribes the good that the medicine or treatment will do you depend on two things:

- 1st.—The way in which your Druggist fills the prescription—the "stuff" he puts into it and the way he puts it in.
- 2nd.—A great deal depends on how carefully you are in carrying out his orders; whether you take the medicine as he directs and do as he says or as you please.

TOBACCO satisfaction—a chew of "Right-Cut," the Real Tobacco Chew. The comforting taste of rich, mellow, sappy tobacco comes—and it lasts. Made of ripe, mellow tobacco—seasoned and sweetened just enough. "Right-Cut" goes twice as far as any other tobacco for the same money. Get a pouch and see for yourself.

Take a very small chew—less than one-quarter the old size. It will be more satisfying than a mouthful of ordinary tobacco. Just nibble on it until you find the strength chew that suits you. Tuck it away. Then let it rest. See how easily and evenly the real tobacco taste comes, how it satisfies without grinding, how much less you have to spit, how few chews you take to be tobacco satisfied. That's why it is the Real Tobacco Chew. That's why it costs less in the end.

It is a ready chew, cut fine and short shred so that you won't have to grind on it with your teeth. Grinding on ordinary tobacco makes you spit too much.

The taste of pure, rich tobacco does not need to be covered up with molasses and licorice. Notice how the salt brings out the rich tobacco taste in "Right-Cut."

One small chew takes the place of two big chews of the old kind.
