THE GOOD JUDGE MEETS THE LUCKY MINER.

Of course it's different! Just as different as gold and silver. Think of a little chew giving so much tobacco satisfaction.

It's the Real Tobacco Chew. Pure, sappy, full-bodied tobacco—seasoned and sweetened just enough.

Different in cut, too. A ready chew that gives up its tobacco substance steady, without grinding. Easier handled, and twice as satisfying.

Take a very small chew—less than one-quarter the old size. It will be more satisfying than a mouthful of ordinary tobacco. Just nibble on it until you find the strength chew that suits you. Tuck it away. Then let it rest. See how easily and evenly the real tobacco taste comes, how it satisfies without grinding, how much less you have to spit, how few chews you take to be tobacco satisfied. That's why it is *The Real Tobacco Chew*. That's why it costs less in the end.

It is a ready chew, cut fine and short so that you won't have to grind on it with your teeth. Grinding ordinary candied tobacco makes you spit too much.

One small chew takes the place of two big chews of the old kind.
