THE GOOD JUDGE UNDERSTANDS THE LUMBERMANS LOG.

NOBODY sees that little chew of "Right-Cut" tucked away there in your cheek—

And all the time it is giving you more comfort and tobacco satisfaction than a big wad of the old kind.

It's the Real Tobacco Chew—and by the time you've used up half a pouch of it you won't need anybody to tell you so. Your own comfort will be telling you that at last you are getting the tobacco comfort you've wanted all your life.

Take a very small chew—less than one-quarter the old size. It will be more satisfying than a mouthful of ordinary tobacco. Just nibble on it until you find the strength chew that suits you. Tuck it away. Then let it rest. See how easily and evenly the real tobacco taste comes, how it satisfies without grinding, how much less you have to spit, how few chews you take to be tobacco satisfied. That's why it is the Real Tobacco Chew. That's why it costs less in the end.

It is a ready chew, cut fine and short so that you won't have to grind on it with your teeth. Grinding ordinary candied tobacco makes you spit too much.

The taste of pure, rich tobacco does not need to be covered up with molasses and licorice. Notice how the salt brings out the rich tobacco taste in "Right-Cut."

One small chew takes the place of two big chews of the old kind.
