### GOVERNMENT READY TO SUPPLY LABORERS

Portland, Ore., Aug. 5.—The United States Government hereby notifies farmers, ranchmen, stockmen, fruit growers, hopraisers and all other employers that through the Employment Branch of the Department of Labor it is prepared to furnish free of charge workers in any number, male or female, skilled or unskilled, native-born or foreigners, English-speaking or those of alien tongue.

The Government's employment service is a national affair with branches in every large city of the United States. Through an interchange of information between these numerous offices, all the various districts or zones are kept advised of labor conditions throughout the country. If opportunities for work can not be filled by the district in which they originate they are referred to other branches for action.

Any postmaster or agent of the Department of Agriculture is authorized to receive applications for help from employers or requests for work from those desiring same. Or, better still, such applications may be sent direct to the Employment Branch, Department of Labor, 424 Railway Exchange Building, Portland, Oregon, by which office they will be promptly acknowledged.

#### NOTICE TO CREDITORS

Notice is hereby given that the undersigned has been appointed administratrix of the estate of Stanislaw K. Noel deceased. All persons having claims against said estate are hereby notified to present the same, duly verified and with the proper vouchers, to the administratrix at the office of Woodcock, Smith & Bryson, 219 Barnard Building, Eugene, Oregon, within six months from the date of the first publication of this notice. Date of the first publication of this notice August 5, 1915. BERENICE NOEL, Administratrix of the estate of Stanislaw K. Noel, deceased.

## DEER-HUNTING TO BEGIN AUGUST 15

With the deer hunting season less than two weeks off, it would be well for the hunter to begin to think up the many important things and laws by which he must abide before departing on his journey to the mountains.

It is unlawful to kill any but buck deer with horns; it is unlawful to hunt at night; it is unlawful to hunt without having a hunters' license on one's person and to refuse to show the license to a game warden; it is unlawful to hunt on any game preserve; it is unlawful to disguise the sex or kind of any game killed.

It is also unlawful to hunt deer with dogs, as well as to lie in wait near licks while hunting deer. No person is permitted to have in possession more than 40 pounds of jerked venison.

The state of Oregon is divided into two great sections, each of which has different dates for opening the season on certain game and fish.

District number one comprises the counties west of the Cascades, while district number two comprises the rest of Oregon.

The open season on some things, for instance, deer, is the same in both districts, August 15 to October 31. A short season on Chinese pheasants is allotted to section number two. It is unlawful to kill this bird in any counties in the second district except Union and only in that county from October 1 to 10. The deer season in all counties east of the Cascade mountains opens on August 15, and closes October 31, the same as on the Pacific slope.

### OREGON DAIRYMEN PLAN INDIVIDUAL COW TESTING

Oregon Agricultural College, Corvallis, Aug. 2.—A good many dairymen of Oregon who are operating in parts of the state not yet developed in this industry are planning to carry on cow testing individually with the aid of the public schools. This is in line with the policy advocated by Professor E. B. Fitts, Extension Dairyman of the Agricultural College, who has just returned from a successful tour through dairy districts of this kind.

"My suggestion to these dairymen," says Professor Fitts, "was that they should join cow-testing associations as soon as the number of cows sufficient for organization are secured in their locality, but in the meantime not to wait for organizing before beginning the work of testing. These dairymen were shown how they could get a pair of scales and suitable record blanks and weigh the milk of each cow at each milking and record the result. In this way, a comparatively exact record of production will be made.

"As to testing for percentage of butter fat, it is suggested that a Babcock tester be secured by the local school and that testing be done by students under the direction of the teachers or other qualified persons. In this way, the butter fat content of the milk can be secured at a small cost and when this is compared with production records, each dairyman will know just what his cows are doing. They were also advised in this connection that unless the cow gives at least 200 pounds of butter fat per year she should be eliminated from the herd and her place filled by a more profitable animal.

"With 200-pound cows dairying should be profitable in the sections visited. Cows can be kept on pasture for six months of the year at a cost of \$3 for the entire time. For the remaining six months, two tons of hay at \$10 a ton and a half ton of grain at \$30 per ton will keep the animals in good milking condition. Thus the cost of keeping the cow for one year averages about \$38. If she produces 200 pounds of butter fat at 25 cents a pound she is making a fair profit for her owner when the value of her milk on the farm and her fertilizing value are considered.

"Women, as well as men, are deeply interested in this phase of the business and some of them assured me that they would keep a record of production and if possible secure butter-fat tests on the product of each cow during the coming year."

### TIME TO SPRAY AGAIN

#### Third Dose Should Be Given Codlin Moth Now

"It is time for the third spraying against the codlin moth on apple trees," said C. E. Stewart, Lane county fruit inspector, who was in the city yesterday. "Use one pound of arsenate of lead, dry, or two pounds of the paste arsenate of lead to 50 gallons of spray should be used at this time except on late winter apples, and then not more than one gallon to 45 gallons of water. Keep the mixture well agitated and spray under high pressure.

Inspector Stewart says that the first moths of the second brood are now appearing, and a good spraying is necessary to kill them.

The inspector says the apple crop is large this year and that most of the growers are spraying regularly, notwithstanding the poor outlook for a good price for the fruit.—Register.

### WHOLE NATION CAPTIVATED BY LOGANBERRY

(Continued from Page 1.)

the time, was judge of the superior court, and experimented with plants as a hobby. Though 75 years of age he is still experimenting and with him at the Oregon building on Friday was a beautiful little blue-eyed Loganberry that attracted the attention of everyone.

The Oregonian says: Commission government in Portland by the present Commissioners—or a majority thereof—is growing into a shameful travesty on reform.

Powers, Coos County, will have an \$18,000 school.

The Oregon Power Co., at Albany has in prospect 156 horsepower of new business.

The Oregon Power Co., has ordered a car load of iron grates and feed holes from the Eugene Iron Works.

**JUST a nibble will satisfy you—because it is the Real Tobacco Chew.**

By the time you've used up a pouch you'll be telling your friends about it same as the thousands are doing every day.

A little chew of pure, rich, mellow tobacco—seasoned and sweetened just enough—cuts out so much of the grinding and spitting.

THE REAL TOBACCO CHEW IS NOW CUT TWO WAYS!! W-B CUT IS LONG SHRED. RIGHT-CUT IS SHORT SHRED.

Take less than one-quarter the old size chew. It will be more satisfying than a mouthful of ordinary tobacco. Just take a nibble of it until you find the strength chew that suits you, then see how easily and evenly the real tobacco taste comes, how it satisfies, how much less you have to spit, how few chews you take to be tobacco satisfied. That's why it is *The Real Tobacco Chew*. That's why it costs less in the end. The taste of pure, rich tobacco does not need to be covered up. An excess of licorice and sweetening makes you spit too much.

One small chew takes the place of two big chews of the old kind.

Notice how the salt brings out the rich tobacco taste.

## Notice

Water for irrigating and sprinkling purposes can be used only during the HOURS specified—6:00 to 8:00 a. m. and 5:00 to 9:00 p. m. Therefore if the water is used for such purposes at other intervals during the day the company will install meters where this abuse is being practiced. It is a duty involved upon the company to protect the city from fire and furnish an adequate supply of water to all, therefore we will thank our patrons if they will assist us in trying to protect the interest of themselves as well as the city at large.
