

J. Rufus Wallingford says,

"Should we decide to do it, a Herring and the Moving Pictures could make a fortune for YOU."

"We have figured," says J. Rufus Wallingford, "that if some one were to induce ten thousand American men, women and children to invest the price of a ten cent loaf of bread in what might be called a Wallingford Movie Ring and if every member of the ring got together two customers each we would have 30,000 patrons with whom to start a co-operative theater. Giving coupons as an inducement, every patron would be asked to get two new customers, and very conservatively speaking we could have THIRTY-FIVE MILLION customers coming for admission from all over the country, which would make possible the opening of a chain of theaters, starting a jitney bus industry, a moving picture magazine, a producing picture company, etc. In addition, a herring farm might be started as a side line. As you know, perfect propagation of the offspring of a single herring should yield 1,000,000,000,000,000,000,000,000 herrings in eight years. Figure up what these would sell for at from 25 cents to 75 cents each. Now, if such a thing were started, simple arithmetic teaches us that the original investment of a dime would be liable to earn \$158,976.23 at least or possibly more in five years. Keep your eye on us. Perhaps we will start something"

FOREST NOTES

Within the national forest boundaries are some twenty-one million acres in private ownership, consisting of lands granted or taken up for different purposes before the forests were created or of homestead entries made since. In Oregon there are about two and a half million acres of such lands within the national forest boundaries, and in Washington nearly two million acres.

Mineral lands within the national forests are governed by the same public land laws as such lands outside the forests. For the fiscal year 1915, the following facts are shown on the Forest Service records for District 6 (Oregon, Washington and Alaska) in regard to coal and mineral claims: Claims pending at the beginning of the year, mineral 9, coal 15. New claims during the year, mineral 38, coal 20. Claims patented during the year, mineral 37, coal 16. Claims canceled during the year, mineral 5, coal 3. More than 500 mineral claims were patented within the national forests of the United States during the fiscal year 1915.

Of the 10,905 timber sales made on the national forests of the United States during the last fiscal year, 10,621 were for amounts under \$100 each. In the forests of Alaska there were 290 such sales, in Oregon 724, and in Washington 122, making a total of 1,136 sales under \$100 each. In the Northwest forests there were also six large sales ranging from \$11,000 to over \$1,000,000.

The exports of logs and round timber from the United States in 1914 were approximately 138 million feet, while the imports were nearly 149 million feet. The exports went to Germany, the United Kingdom, Canada and the Netherlands, whereas the imports came chiefly from Canada.

The imports of laths into the United States during 1914 were over one and a half million dollars, of which more than 99 per cent came from Canada.

The exports of shingles from the United States in 1914 were approximately 47 million, valued at \$112,463, and the imports were about 895 million valued at nearly three million dollars. Canada received more than 72 per cent of the exports and was the source of about 98 per cent of the imports.

The cedar imported into the United States during 1914 amounted to over 17 million feet, valued at nearly one million dollars, of which more than half came from Cuba.

The imports of pulp wood in 1914 were over one million cords valued at over seven million dollars, all of which came from Canada.

Compared with other countries, the United States ranks first in the world's trade in spirits of turpentine, exporting about three fourths of the world's supply. The exports in 1914 were nearly 19 million gallons, valued at over eight million dollars.

Salem, Dec. 13.—Eugene will have Caterpillar cars on streets. Big shipbuilding is proposed at St. Helens capable of building steel boats.

Final announcement is made that total tax levy will be \$562,000 less than last year. Burns promises \$125,000 if Strahorn road will include that city.

City auditor of Portland refuses to approve claims of city officials for seats in observation cars. Smoker or chair cars are
