

OFFICIAL COUNT OF LANE'S VOTE GIVES HUGHES 1379 LEAD

"Bone Dry" Amendment Carries By Good Margin—Three Democrats Elected to Office

With practically a complete official count of Lane county's vote in the former predictions of the News are substantiated. The voters gave Charles Hughes 1379 more votes than were cast for the democratic candidate.

The official vote on presidential electors follows:

FEED A BALANCED RATION

The feeding of a dairy cow should be governed by the cow's capacity to produce milk. By keeping a daily record of each cow's production the skillful feeder soon finds that some cows in the herd respond to an increased allowance of feed and return a good profit on it.

overfat should the quantity of roughage be restricted.

2. A grain mixture should be fed in the proportions of 1 pound to each 3 pints or pounds of milk produced daily by the cow, except in the case of a cow producing a flow of 40 pounds or more, when the ration can be 1 pound to each 3 1/2 or 4 pounds of milk.

3. Feed all the cow will respond to in milk production. When she begins to put on flesh cut down the grain. For the most profitable milk production, the cow must be fed a balanced ration at the cheapest price such ration can be provided.

Corn silage, corn stover, timothy hay, millet hay, prairie hay, hays from the common grasses, straws from the various cereals, and cottonseed hulls may be classed as low in protein content, while legume hays, such as alfalfa, the clovers, cowpeas, soy beans, and oats and pea, are classed as roughage high in protein.
