GRADE YOUR POTATOES

Because the potato market is being demoralized by the pouring in of all grades of potatoes, the small knobby mixed with the large and smooth tubers, Acting Food Administrator W. K. Newell, issues a warning to all potato growers, large and small, to grade their product carefully before sacking and shipping.

"The small potatoes of poor quality are not worth sacking and shipping," said Mr. Newell, "and when mixed with the better product they spoil the market and bring down the prices. Let the grower offer the smaller and inferior potatoes at a low price near the point of production, sell in quantity to the starch factories or canneries, or use them for stock feed. Do not mix them with the better quality and demoralize the whole potato market. Because there is not sufficient market in Oregon this year for her potato crop, approximately 4,000 cars, it is estimated, must be shipped to outside markets, and in order to find a ready sale and good price, the potatoes must be of good quality. Let every grower bear this in mind and hold himself responsible for the proper grading of his product before shipment."

OREGON PRODUCTS FOR OREGON PEOPLE

No individual making his home in Oregon can say to himself "I have no interest in bigger payrolls for Oregon."

In some way or other every person in this state is benefited by circulation of payroll money.

In past years, and even now, Oregon's effort has been principally directed to marketing the natural resources of the state and paying no attention to building up payrolls. Consumers and merchants must give preference, on terms of equal price and quality, to products of our factories.

If the manufacturers of Oregon can grow to a size that will enable them to reach out into other states, the increased business means bringing just that much more money into the state in which the payroll is maintained.

We have formed a habit of thinking that the lumber industry is the backbone and ribs of all our prosperity, and yet several single factories in comparatively small Eastern cities carry more people and pay out

more money in payrolls in the manufacture of one automobile than our entire lumber industry of Oregon amounts to.—Coos Bay Times.

"THE CHOSEN ARMY"

Why not call it the "chosen" army? Why not call its members the "chosen" soldiers? There seems to be a general desire to get away from the word "drafted," and this is justified. What term could better describe this great new army of men who have been selected to help make the world safe for democracy than "chosen?" Literally, they are chosen men. Chosen from their fellows to fight for freedom in the greatest struggle of the ages. Chosen to measure the strength of their ideas against the brute force of might. Chosen for a really sacred purpose. And in a true way carrying out the Master's words, "For many are called but few are chosen." If you will turn to the book from which these are quoted you will find in the gospel of John other words from the same lips—words which seem marvelously fitted to the rising up of this army. "I have chosen you and ordained you, that ye should go and bring forth fruit, and that your fruit should remain." No better or truer statement of the situation could be made. They are chosen to bring forth the fruit of victory. In this instance the fruit of victory is freedom. And they are offering themselves in order that this freedom shall remain.—Philadelphia North American.

An Old Man's Stomach

As we grow older and less active, less and less food is required to meet the demands of our bodies. If too much is habitually taken, the stomach will rebel. When a man reaches the advanced age of 85 or 90, you will find that he is a light eater. Be as careful as you will, however, you will occasionally eat more than you should and will feel the need of Chamberlain's Tablets to correct the disorder. These tablets do not contain pepsin, but strengthen the stomach and enable it to perform its functions naturally. They also cause a gentle movement of the bowels.
