**THE DUNNING SYSTEM**  
St. Louis, April 25, 1910.

My Dear Mrs. Dunning:  
I greatly enjoyed your lucid and intelligent delineation of the Dunning System of Music Study for Beginners, with the unique apparatus used, which must be as interesting and instructive to older pupils as the children. I was deeply impressed with its adaptability to the vocal teachers' needs as well as to the instrumentals, and I believe that its general use would revolutionize the study of music for the masses and give them that broad intellectual foundation which is usually lacking. This system certainly fills a long-felt want in ear training, sight reading, transposition, and memory work, and I recommend it to every progressive, conscientious teacher, both vocal and instrumental.

JOHANNA GADSKI TAUSER.  
This system of improved music study is taught by Iman Wilson Shontz, Studio Fourth and D.
