

# An Iron Tonic That Will Brace You Up for Spring Days

You feel better all year if you take a good tonic at this season.

Beef, Iron and Wine provides just the elements needed to put iron in the blood, give you nerves like steel, an appetite like an ostrich, and power to perfectly digest what you eat.

Take it now and feel at your best this spring.

Pints \$1.00, quarts \$1.50

PHONE 31

Mr. and Mrs. Davies, who have been living on North Seventh street for the past few months, have moved to Portland where Mr. Davies has secured employment.

Come to the Bargain sale at Wolf & Miller's

Herman Mason, district deputy of the Modern Woodmen of America, came to Springfield Tuesday on business. Mr. Mason is contemplating moving to Springfield.

You get your money's worth and then some when you buy your shoes at the W. A. HALL Shoe Store.

Dr. R. P. Mortenson, of this city, left Tuesday for Portland where he will be treated for stomach trouble.

John Lang, of Portland, spent Sunday at the home of his uncle, Felix Wesolowska, and family.

**FEEDERS, ATTENTION!** We have made a deal with the Springfield Flour Mill to handle their output of Bran, Shorts, Middlings and Millfeed. We can sell for lower prices now and will offer you a better quality of feed. Let us figure on your needs. The Mill start grinding today. We have also made arrangements to wholesale and retail the Noxall flour. This brand of flour is well known thru this section and needs no recommendation from us. Every sack is guaranteed. Insist on getting it of your grocer. It costs no more than other valley brands and by using it you will be doing a double patriotic duty—boosting your home town and saving the railroads their cars for other purposes. If your grocer refuses to get Noxall flour for you you can get it at our store. **SPRINGFIELD FEED COMPANY**

Mr. and Mrs. T. C. Guthrie are preparing to move from Cedar Flats where they have been living for a number of years to Eugene, where their daughter May is attending High school.

Reliable remedies right reasonable—**REXALL**.

Joseph Parker, of Dexter, was a Springfield business visitor yesterday.

**READ CAREFULLY**  
Without a definite arrangement to the contrary, our terms of credit are 30 days. We have bills to pay and like to meet them as promptly as possible. It is necessary for us to collect our bills and will thank you to pay NOW. If you pay on the 10th remember the date and begin now to get ready for it.  
**J. C. HOLBROOK**

**Utilized Artificial Flood.**  
By means of an artificial rise, started on October 18, 1912, at Dam No. 7, Ohio river, and augmented by water from the Muskingum, Kanawha and Big Sandy rivers, more than 80,000 tons of coal from the Kanawha river were delivered to Cincinnati and other river cities, says a bulletin of the department of commerce. Every available tugboat and barge was used in this movement, even the small harbor boat of one of the coal companies being utilized to bring down four coal boats, and a snowboat pusher was chartered to bring down ten barges. Fourteen tows of more than 200 craft were in the movement. Last August, during a period of extremely low water, a fleet of barges, which carried 13,000 tons of coal, was successfully moved by means of artificial floods. About a year ago two similar experiments were carried out successfully at a time when there was a shortage of coal in Cincinnati.

**Unmanned Boats Foiled.**  
The Germans recently attempted an attack on British warships by means of small boats loaded with high explosives, unmanned and controlled by wireless. The idea was originally an American one, and was developed in the Hammond wireless controlled torpedo. But the drawback in all these radio-controlled devices is that the enemy can send out "interfering" waves and throw the boat off its course. The latest improvement in boats controlled from shore is said to be a craft whose course is directed by playing a searchlight on a selenium cell. The electrical resistance of selenium varies in light and darkness, and this fact can be taken advantage of to manipulate a steering apparatus by means of the finger of the searchlight beam.

**Government to Use Buildings.**  
Prof. C. C. Nutting, who will lead a party of Iowa scientists in an expedition to the West Indies next summer, has received word, says the Iowa University News Letter, that the English government building on the Pelican Islands, which will be the base of the expedition, will not be turned over to the explorers without cost. Some of the men who intended to go with this expedition at first have since entered war service, but plans are going forward rapidly and the outlook is most promising, Professor Nutting declares. He made a preliminary visit to the goal of the expedition last summer, and says that he has never seen a place where the opportunity for scientific research was any greater.

### THE DUNNING SYSTEM

St. Louis, April 25, 1910.

My Dear Mrs. Dunning:

I greatly enjoyed your lucid and intelligent delineation of the Dunning System of Music Study for Beginners, with the unique apparatus used, which must be as interesting and instructive to older pupils as the children. I was deeply impressed with its adaptability to the vocal teachers' needs as well as to the instrumentalists, and I believe that its general use would revolutionize the study of music for the masses and give them that broad intellectual foundation which is usually lacking. This system certainly fills a long-felt want in ear training, sight reading, transposition, and memory work, and I recommend it to every progressive, conscientious teacher, both vocal and instrumental.

JOHANNA GADSKI TAUSHER

The Dunning System of Improved Music Study is taught by IRMA WILSON SHONTZ Studio, Fourth and D
