About Constipation

Certain articles of diet tend to check movements of the bowels. The most common of these are cheese, tea and boiled milk. On the other hand raw fruits, especially apples and bananas, also graham bread and whole wheat bread promote a movement of the bowels. When the bowels are badly constipated, however, the sure way is to take one or two of Chamberlain's Tablets immediately after supper.

SAVE FUEL AND BE HEALTHIER

Overheated Dry Air Makes Man Too Susceptible to Disease, Declares Physician.

Washington.—Further endorsement of the campaign of the United States fuel administration against overheating has been given by eminent physicians of the country. Dr. James J. Walsh, physician, doctor of philosophy, and author, said:

"Pneumonia takes a little more than one man in eight and therefore has wrested from tuberculosis the grim honor of killing the most human beings. Man is a marine animal, seven-eighths water. He needs cool air and moisture around him. Overheated dry air makes him too susceptible to disease. In a temperature of over 68 degrees it is difficult for men and women to exist healthfully. If Americans can be taught to live in this temperature the number of pneumonia victims will surely decrease. Fresh, cool, moist air is the foe of pneumonia and persons who keep their houses cool and breathe fresh, moist air need have no fear of it."

Pennsylvania Boy Gets Able Assistance in Landing 250-Pound Black Bear.

Warren, Pa.—Willie Harkenschmidt, fifteen, of Salmon creek, came to town the other day with a 250-pound black bear on his farm wagon.

"I couldn't have got him if it hadn't been for father's pigs," he explained. "I was out in the woods after rabbits when I heard one of the pigs squeal. I ran toward the sound and when I got there a big black bear had one of the little squealers in his paws. The others were crazy. They were pawing the bear all over. He dropped the pig and started to run when he saw me, but the pigs held him until I could get close enough to give him both barrels."
