SHALL WE DO LESS FOR OUR SOLDIERS?

If the motive of thrift does not appeal to you in the matter of purchasing War Savings Stamps, consider the appeal of your patriotism. Our country is engaged in a terrible war. Thousands of our brothers are enduring the miseries of camp life and the fearful strain and danger of the trenches. Thousands of them will offer their lives, other thousands will be maimed or crippled or injured in health. The country needs money to maintain them and to make their service effective. The War Savings Stamps and Certificates are a means of raising this needed money. The country looks to you to furnish it.

It is your part in winning the war for democracy. How small a part it is! It may require some self-sacrifice as to luxuries and pleasures. It may, indeed, demand self-denial and abstinence from comforts—even a reduction in the amount of what are regarded as necessities. But, even if it does what are these discomforts, compared with those suffered by the young men who are fighting your battles?

Your part is, indeed, small in the great sacrifice. Will you not cheerfully, manfully "do your bit"?

A GREAT EMERGENCY IN OREGON

Oregon has 500 carloads of surplus potatoes, say \$250,000 worth at retail, which will spoil by summer if not eaten. Our soldiers and Allies on the blood-drenched fields of France must have 75,000,000 to 90,000,000 bushels of wheat between now and harvest or quit fighting. Potatoes are cheap. We must eat them and send the wheat to the front. We are actually not eating as many potatoes this year as last, when potato prices were sky high. Isn't that just like human nature? To use this Oregon surplus every person in Oregon over ten years of age should eat about half a bushel more of potatoes in the next three months than he usually eats. There are 270 meals in three months, and this means we should add an average of nearly two ounces of potatoes to every one of our meals every day until July.

Can we do it? The Germans eat three times as many potatoes as we do. They are literally winning the war on potatoes. Shall we do less? We must fight the Kaiser man for man, shell for shell and potato for potato. Think of the wheat Oregon can save by eating her surplus potatoes.

Unless the farmers can sell their potatoes they will be discouraged and refuse to grow them this year. A short age is bound to follow, with soaring prices. And if world-shortage of wheat continues, that might mean famine. Let everyone double or treble his present use of potatoes.

Potatoes are good fuel. They furnish starch which burns in your muscles to let you work, much as the gasoline burns in an automobile engine to make the car go. One medium-sized potato gives you as much starch as one slice of bread. When you have potatoes for a meal you need less bread. Potatoes can save wheat. They can give you salts to renew and build all parts of your body and to keep it in order. Cook your

potatoes well and serve them attractively. An old king is said to have tested each cook before hiring him by asking him to boil a potato. Even the best potato can be spoiled by a poor cook.

FURTHER LIMITS USE OF WHEAT FLOUR

Under the new baking rules issued by the Food Administration, the substitute for wheat flour content of all bread and rolls must amount to 25 per cent. The substitute content hereafter required in various products follows:

Sweet yeast dough goods, 33 1/2 per cent; crackers, 15 per cent; cookies and ice-cream cones, 33 1/2 per cent; cakes, 33 1/2 per cent; pies, 33 1/2 per cent; fried cakes, 33 1/2 per cent; pastry, 33 1/2 per cent; batter cakes, waffles, quickbreads—such as muffins and Boston brown bread, 66 2/3 per cent.

Under the new rules no public eating place may serve more than 2 ounces of bread and rolls or more than 4 ounces of quick bread to any one person at any one meal.

With customers who buy loaf bread, bakers are urged to promote the use of the three-quarter pound loaf, following the Food Administration's request that the 12-ounce loaf be used where the 16-ounce loaf was used before.

Bakers are urged to introduce "quick breads" as a wheat-saver measure. These quick breads, including muffins, baking-powder biscuits, corn bread, Boston brown bread, griddle cakes, and waffles, must contain two-thirds wheat-flour substitutes.

The use of the words "milk" or "cream" on wrappers and labels is no longer prohibited, but milk bread must still be sold at the same price as bread made without milk.

AMERICAN ENGINEERS BUILD RAILWAYS IN FRANCE

The official review of the first year of war issued by the Committee on Public Information contained the following description of the work of American engineers in France:

American engineers have gone into French forests and done the work of the pioneers of our Northwest. They have frequently been under fire. One of their first tasks was the reconstruction and extension of a railroad 600 miles long to carry our products from ports of disembarkation to general bases of operation.

The First Engineer troops, 1,100 strong, arrived in France about three months after war was declared. Since then the number has been greatly augmented. These troops have been constantly engaged in general engineering work, including the construction of railways, docks, wharves, cantonments, and hospitals.

BOARD APPROVES MANY LOANS.

A review of the first year of operation of the Federal Farm Loan System shows that 2,808 national farm loan associations were incorporated, representing about four associations to each five counties of the United States. They average 29 members, or a total membership of about 56,000 farmers.

The 12 land banks have received applications for over 120,000 loans, amounting to about \$300,000,000. About 80,000 loans, amounting to over \$160,000,000, have been approved, and on 30,000 of these loans over \$80,000,000 has been paid to the farmers.

Previous Issues Are Convertible

Bonds of First and Second Liberty Loan Can Be Changed For Third

The First National Bank of this city is in receipt of notice from the Governor of the Federal Reserve Bank, of San Francisco, in regard to conversion of bonds of the First and Second Liberty Loans and the First Liberty Loan converted into bonds bearing the same rate of interest as the Third Liberty Loan bonds or 4 1/4 per cent.

The notice reads as follows: "Notice is therefore given to all banks and to individuals not to send to the Federal Reserve Bank of San Francisco interim certificates or bonds of the First and Second Liberty Loans or First Liberty Loan Bonds Converted, for conversion into bonds bearing interest at the rate of 4 1/4 per cent until announcement is made publicly by means of circular or otherwise, of the conditions under which such conversion will be made."

"Treasury department circulars and regulations covering conversion of bonds are now being prepared and at the proper time all banks in the Twelfth Federal Reserve District will be supplied with the necessary forms and application to be used in this connection."

"It is so essential that these forms be used that we will be compelled to return at the owner's expense, bonds sent to us for conversion before the plans relating thereto, and the forms used in connection therewith, are supplied by the Federal Reserve Bank."

A. S. BURLISON,

Nature Cures, The Doctor Takes the Fee.

There is an old saying that "Nature cures, the doctor takes the fee," but as everyone knows you can help Nature very much and thereby enable it to effect a cure in much less time than is usually required. This is particularly true of colds. Chamberlain's Cough Remedy relieves the lungs, liquefies the tough mucus and aids in its expectoration, allays the cough and aids Nature in restoring the system to a healthy condition.
