VARIOUS LIBERTY BOND ISSUES

There are at present issued and outstanding four issues of Liberty Bonds, and soon there will be six issues. They are as follows:

1. The original bonds of the First Liberty Loan; these bear 3 1/2 per cent interest and mature June 15, 1947, but are redeemable at the Government's option on or after June 15, 1932. They have a conversion privilege.

2. The original bonds of the Second Liberty Loan; they bear 4 per cent interest and mature November 15, 1942, but are redeemable at the Government's option on or after November 15, 1927. They have a conversion privilege.

3. Bonds of the second issue which have been obtained by the conversion of bonds of the first issue into bonds of the second; they bear 4 per cent interest and mature June 15, 1947, but are redeemable on or after June 15, 1932. They have a conversion privilege.

4. The original bonds of the Third Liberty Loan; they bear 4 1/2 per cent interest and mature September 15, 1928, and are not redeemable until maturity. They have no conversion privilege.

The other two issues which will soon be outstanding will be 4 1/2 per cent bonds obtained by the conversion of bonds of the first issue, and 4 1/2 per cent bonds obtained by conversion of bonds of the second issue, into bonds of the Third Liberty Loan. They will have no conversion privilege.

MANY TRAINED WORKERS NEEDED.

The civilian branches of the army and navy are in need of thousands of highly trained workers, and before the end of 1918 these branches must be increased by at least 20,000, according to the Civil Service Commission.

The ordnance department of the army needs large numbers of mechanical engineers, draftsmen, chemists, and metallurgists. Thousands of inspectors are wanted to pass on the quality of ordnance, ammunition, and other supplies. For office work statisticians, accountants, assistants in business administration, and specially trained clerks are needed.

The quartermaster corps wants several thousand examiners and inspectors, and passenger and freight clerks are needed. The signal corps is short of draftsmen.

The navy has an unlimited number of places for draftsmen, and a long list of positions for technical workers. Practically all branches of the service need stenographers, typists, bookkeepers, and clerks.

USE MORE POTATOES.

Our wheat supply is short; our supply of potatoes is abundant. Decrease your consumption of wheat by increasing your use of potatoes. There is no limit on the amount of potatoes that may be used, while every person is asked to limit his use of wheat to one and one-half pounds per week.

OUR MONEY NOT WASTED.
 All of the money being expended for war purposes is not going to be a waste. Some of it is going to be shot away; some of it is going to be sunk at sea; some of it is going to be invested in machinery that will be useless in time of peace.
 But a very great portion of it is being spent for things that will be as valuable when peace comes as now, though not so imperatively needed then—ships for instance. And as for the immense amount spent in adapting our manufacturing plants to war purposes, it is estimated that 90 per cent of our war machinery can and will be used for other manufacturing work after the war.
 The invisible and intangible forces, the moral forces of the world, the soul and conscience of mankind are fighting on our side.

WHERE SOLDIERS ARE BETTER
 Army Officer Explains the Benefits of Development of Physiological Resistance.
 In an interview with Surgeon General Gorgus for the American Magazine, about the chances your boy has to come back alive, the author says, referring to another army officer for the moment:
 "Major Crile said another thing which every mother and father ought to learn by heart. He said: 'The thing which affects a wounded man's chances more than almost anything else is physiological resistance. That is where the soldier puts it all over the civilian every time. When a man goes out from the worries, responsibilities, anxieties, and irritations of civil life to the peaceful pursuit of war—'
 "He stopped and laughed. Then he went on seriously:
 "I mean that! I've seen these slow, pasty young clerks get out and turn into men! I've seen young chaps who were little more than flabby human jellyfish transformed by their life in the trenches into husky fellows that were grit clean through. They laughed at things which would have finished them completely before they went into the army. They had developed the biggest factor in a wounded man's chances—physiological resistance. And it was their life as soldiers that gave them this new possession."
