Increasing Use of Rare Metals. "Among the remarkable industrial developments to which the European war has given impetus has been the enlarged use of the rare metals," says Maj. William A. Mensch of San Diego, Cal. "Tungsten, vanadium and molybdenum, used in making steel, seem to be the leaders. Of these three perhaps the least familiar to American steel makers is molybdenum, which, though well-known to European forge masters, has but comparatively limited use in this country."

Record Broken. Sour Stomach. This is a mild form of indigestion. It is usually brought on by eating too rapidly or too much, or of food not suited to your digestive organs. If you will eat slowly, masticate your food thoroughly, eat but little meat and none at all for supper you will more than likely avoid the sour stomach without taking any medicine whatever. When you have sour stomach take one of Chamberlain's Tablets to aid digestion. adv.

SOCIAL EVENTS

YOUNG SET HAVE PICNIC.

Last Tuesday evening a number of the younger set of Springfield started in four cars (no, not four cars either, but two cars and two Fords) and reached their destination at the bridge near Walterville, where they spent a merry evening. Naturally, it would be impossible to get there and back and no mishaps, but thanks to all that is good we were plus a very useful mechanic in the person of Bill Rodenbaugh. With the help of this necessary person two blow-outs and one fan belt were made good. After all had arrived there seemed to be a Ford missing with four very important personages in it, and after some time it was discovered that I Male had endeavored to ride to Walterville and had the worst blow-out that was ever known for a Ford, but after some time and labor they arrived in the circle and the sensational act of roasting weenies over the fire was begun. Everything necessary for a picnic of the best kind was on hand—weenies, buns, pickles, marshmallows and grape juice, as well as lemonade and R-porter. The very woods around resounded with such expressions as "Say, get that weenie out of here, it's dripping down my neck," and "Heave me one of those buns, won't you?" At a late hour the homeward journey was begun and one Ford failed so the last that was seen of it was on the road and the unhappy I. Male pumping his hardest on a tire. Those who enjoyed the successful and enjoyable evening were Hazel Dean, Jean Fischer, Bea Holbrook, Bernice Cagley, Audrey Perkins, Dorothy Holbrook, Carrie Ditto, Mrs. William Rodenbaugh, Hay Alexander, Gordon Byrne, Jerry Van Valzah, Russell Olson, Ivan Male, Clarence Kester, Harry Fandrem, Bill Rodenbaugh, and Bill Hill.

When we sing "Three Cheers for the Red, White and Blue," we are singing for the Union Jackie of Great Britain and the tri-color of France, as well as for our own Old Glory. Hence, when we sing it it can be three times lustier.

USE POTATOES INSTEAD OF BREAD

Bread Must Be Saved—Potatoes Contain the Same Nutrient.

How many potatoes are you eating? This is a question the Food Administration wants every loyal American to ask himself or herself. Strange as it may seem, the eating of potatoes at this time is a practical war service, according to a recent Food Administration bulletin, which points out that this nation now has a large potato surplus on hand and that this valuable food, unless eaten within the next two months, will be lost through sprouting and rotting. By eating of potatoes liberally, every family can save a substantial amount of other food, particularly of wheat. By eating up the surplus of potatoes the nation will also prevent serious loss to the potato producer, who needs to be encouraged to grow maximum crops during the coming year.

Domestic science experts have figured that: One ordinary baked potato equals in nourishment one thick slice of wheat bread.

Potatoes at one and one-half to two cents a pound have more food value than bread at ten cents a loaf.

Potatoes are healthful. They improve the general tone of the system by their wholesome action on the digestive organs. They are easiest on the stomach of all vegetable foods. They are easy on the kidneys because of the minimum of nitrogen they contain. They are easy on the intestines because of the tenderness and small proportion of their cellulose and the fine division of starch.

Potatoes are valuable in the diet of the sick. They can be eaten with benefit by people suffering from dyspepsia, anemia, diabetes, Bright's disease, cardiac affections, intestinal troubles, constipation, hyperacidity, arthritis, gout, liver complaints, etc. "Always serve potatoes with meat," concludes the Food Administration bulletin. "Never serve bread and potatoes."

It is reliably rumored that dog flesh is now selling in Chemnitz, Germany, for 50 to 75 cents per pound.

In Genoa, Italy, the Y. M. C. A. has established a meeting place for wounded and convalescent soldiers.

You are only half American unless you do something to help stop the liquor traffic and save wheat in that way.

Defeat the Kaiser and his U-boats. Victory depends on which falls first, food or frightfulness. EAT LESS WHEAT.

It is greed that causes Germany to make war and it is greed that keeps the Germanized liquor traffic in existence.

Both the Kaiser and Kaiserin are suffering from a mild attack of influenza, a Munich despatch stated today.

The bricks of Babylon were cemented with hot bitumen and at every thirteenth row crates of reeds were stuffed in.

Burjan says Austria wanted peace and was forced into the war. It's a shame to give the Kaiser away like that.

Cable orders from the Y. M. C. A. headquarters in France call for 2,000 fountain pens to be shipped immediately.

It is not a bad idea to dedicate a calf or a colt or a part of the grain field to the purchase of War Saving Stamps.

After all the great mass of people are sane and steady. Only a few at each extreme are making the troublesome noise.

The war has aroused a sleeping world to the possibilities of accomplishment. We never before knew how to attack problems.

The building of American ships as a war measure will, after the war place us in a position to take first rank in ocean production and transportation.

It is the intention of the leaders of the Y. M. C. A. to extend the work in France to reach every group of American soldiers. This will require at least 10,000 secretaries. A campaign to recruit these men is now on.
