LOANING BRAINS.

Banking is coming to the front as one of the great constructive industries.

Not so very long ago the banker merely loaned money.

Today he is loaning brains and experience in addition, and without cost. The modern banker finds that he must in many instances anticipate the needs of his customers in obtaining information and statistics relative to industries which may be developed in his community.

The banker realizes that in the success of his community lies his success. Successful industries or farmers mean hundreds and thousands of new depositors and added opportunities for safe loans.

Hence banking is developing more and more into a personal service organization and not a mere cold-blooded money loaning machine as it is often pictured.

ADVANTAGES OF SUGAR BEET PRODUCTION.

The growth of the sugar beet industry will mean over \$100,000,000 to western farmers this year. With proper encouragement and development of this industry this amount could be doubled and trebled in a short time.

Those who have made a careful study of the subject are agreed that introduction of sugar beets into the agriculture of a region results in good in many ways. In the European countries where beet raising has seen its greatest development, agriculture has a stability that is not found in the newer countries where sugar beets have not been introduced.

The fact that the farmer has a sure market for his crop at a price known in advance, enables him to judge more accurately the value of the land. Experience shows the approximate yield of beets he may expect and cost of production.

The raising of sugar beets is not consistent with poor farming.

In all the farming communities work is more pressing in the summer than during the winter. In order to have sufficient help to care for crops during the busy season there is an excess at other times. This means that ordinarily some of the hands are idle and that winter wages are low.

Sugar beet raising calls for intensive farming and promotes a denser population. This makes possible better educational facilities and more desirable social opportunities, thereby reducing to a minimum some of the chief disadvantages of farm life.

ADVANTAGES OF INDIVIDUAL INITIATIVE RECOGNIZED.

Chairman Hurley, of the U. S. Shipping Board, comes out for private ownership of the American Merchant Marine. He says, "We want to avoid the stagnation that sometimes comes from red tape and bureaucracy."

Senator Cummins, of Iowa, says the railroads should be returned to private ownership, but held under government control.

Mark L. Requa, retiring director of the oil division of the Fuel Administration, says:

"Government ownership of everything in general is proposed as the infallible panacea for our alleged national ills. Such action will not benefit humanity, but will destroy the reward of individual efforts."

Americans can feel thankful for such expressions as these which all appear in the press on the same date.

It means that this nation is awakening to the dangers of bureaucracy, paternalism and socialism.

It means that America is still to remain the land where individual enterprise and initiative is recognized and given opportunity to develop.

With shock absorbers
In the bosom of his trousers—
With an accident policy
Upon his person—
And camouflaged
Like a battleship
To deceive the enemy
Bill Hall
Went "over the top"
In the Odd Fellows last night
And is working today.

And his next door neighbor,

Sowed more wild oats
Monday night
By blowing himself
For a seat
At the Mutt and Jeff show
Just sixteen feet south
Of the front row beauty chorus.
And out of the twenty-four
Male occupants
Of the bald-pate row
John was the only one
Who had a
Thatch on his roof.
To identify him
Was a cinch.

The day is fast approaching
When Springfield again

Wouldn't it freeze you?

2 WAR TANKS TO ADVERTISE VICTORY LOAN

Each Pacific Coast State to Get at Least One Tank to Aid Fifth Drive

Twelve tanks which have been assigned to the Twelfth Federal Reserve District for use during the Victory Liberty Loan drive opening April 21 have been assigned to the seven states in the district so that each state in the district will get at least one of the tanks to display during the campaign. The tanks have been assigned as follows: two to Washington, one to Oregon, one to Idaho, one to Utah, one to Nevada, two to Northern California and two to Southern California and Arizona. The remaining two tanks are to be carried on special trophy trains which will tour the district.

Tanks in Sham Battle

Veterans of the American Expeditionary Forces who have seen actual service in France will be the drivers of the tanks during the campaign. Before being distributed throughout the district for the opening of the campaign the tanks will parade in San Francisco and give a sham battle.

All of the tanks are being shipped from the East direct to San Francisco. They are due to arrive there about April 6 when they will be taken to a four acre tract near the Southern Pacific freight yards and assembled by the men who are to drive them. Each of the tanks will be armed with a Maxim machine gun or 37 M.M. smoke bombs with special pilots and lights.

Display of War Relics

In addition to the tanks the special trophy trains will carry a complete display of relics which have been gathered on the battlefields of France and which have been shipped back to this country since the signing of the armistice. Accompanying each of the trains will be an American war hero who will speak for the Victory Loan. One of the trains will tour the North coast and the other will travel through California and the Southwest.
