

# Relieve the Burn of Summer's Sun

The chemical action of the sun on the pigment of the skin is akin to actual burning. The residue is tan or freckles.

The only way to get rid of tan and sunburn, is to stimulate the skin to healthy action and thus expel the discolored pigment.

## Witchhazel Almond Cream

helps to remove tan as nothing else can do. It soothes, heals and feeds the skin. It should be included in every outing equipment—and always have a place on the dressing table.
