MOSQUITOES—WHAT THEY DO AND HOW TO GET RID OF THEM

Mosquitoes are man's inveterate tormentors and foes. At the seaside, on the undrained prairies of the West and Northwest, in the far North, by woodland pool and mountain meadow these blood-thirsty brigands in countless myriads waylay the individual on business or pleasure bent.

Swamps, ponds, and marshes, however, are not the only places which breed mosquitoes. A little rain water in an old tin can or undrained roof gutter, if neglected, will supply mosquitoes for a town or city neighborhood, spreading discomfort, causing insomnia, and tempting to profanity.

If mosquitoes were merely a bothersome plague, there would be ample justification for unrelenting warfare against them, but when it is considered that several species scattered over the United States disseminate malaria, rendering many regions of great fertility almost uninhabitable, and that one kind of mosquito found in the South will convey yellow fever, no argument for fighting them is necessary.

Farmers' Bulletin 444 of the United States Department of Agriculture, entitled "Remedies and Preventatives against Mosquitoes," which was prepared by Dr. L. O. Howard, Chief of the Bureau of Entomology, was first issued in 1911, but it has been reprinted recently and is available for free distribution to persons and organizations interested in mosquito control or eradication. In it are discussed the importance of antimosquito work, protection from bites, smudges and fumigants, apparatus for catching adult mosquitoes, remedies for mosquito bites, abolition of breeding places, drainage measures, destruction of larvae by destruction of breeding places, the practical use of natural enemies of mosquitoes, and deterrent trees and plants.

30,000,000 AMERICANS ARE HOLDING U. S. SECURITIES

Now that the peace treaty has been signed, the United States Government is continuing the sale of Thrift Stamps and War Savings Stamps, not so much because the Government needs the money, as the Government knows that citizens of the nation need a safe, patriotic opportunity to invest their money in order that thrift and saving may become a national characteristic against dark days that may come in the future. There never was a time when saving was considered more important than during war times and now immediately following. The Thrift habit has been formed by many, even the young children, the Thrift Stamps being the unit of saving. The Government desires that this habit be continued, and so continues the opportunity for safe and sound investment in "baby bonds." There are many things to save for, for example:

For the rainy day, or to take advantage of a sunny opportunity; To provide for old age, insurance or an income; To buy a home or get married; To establish your family on Safety Lane; To give children an education or a start in life; To have a "turn-around" fund which will enable you comfortably to meet future adjustments in business or in employment.

The Government will pay you four per cent interest, compounded quarterly, on your investment in War Savings Stamps. If necessary you can cash them in on ten days notice. Urge the children to invest their vacation savings, or part of them, at least, in Thrift Stamps. As an investment it will never be regretted. As a moulder of character the habit of thrift develops the highest type of citizen. Every successful man has been thrifty. History and biography furnish the evidence.

The Fourth of July, 1919, comes more nearly being a real "Independence Day" in the United States of America than any previous day, except the original "birthday" of the American nation in 1776.

The Fourth of July this year sees being the unit of saving. The Government securities, largely in War Savings Stamps. These Americans are more nearly "independent" than ever before, for a financial reserve fund means independence, aside from the practical patriotism that follows active participation in the financial affairs of the nation. Before the war but 30,000 Americans held bonds of their Government. The Thrift Campaign last year brought millions of men, women and children into the rank of better citizenship. The campaign is being continued this year that these and others may become acquainted with the satisfaction there is in putting their small change and their dollars at work in government securities. A solid, prosperous citizenry assures a solid, prosperous nation, and the one constantly interacts on the other.

THE USE OF KEROSENE MEANS A COOL KITCHEN

Most women dread hot summer days when the kitchen becomes as stifling as a furnace. It is plain, hard drudgery to hang over a coal stove as the thermometer mounts higher and higher.

Many women have found by putting in a kerosene stove that their kitchens are kept cool and comfortable even in the hottest days of summer.

But the use of a good kerosene, such as the Standard Oil Company's Pearl Oil, has many other advantages than that of keeping the kitchen cool. It is easy to handle—far easier than either coal or wood. Furthermore, it makes no dirt or dust which must be cleaned up continually. It lights at the touch of a match, so there is no waiting for the fire to come up.

Pearl Oil burns up clean and produces no odor. It is refined and re-refined by a special process which removes the impurities. Wherever it is bought—in the city, in the country, in the mountains, or on the seashore—it is always the same high quality kerosene. It can be bought everywhere in 5 gallon cans, or in bulk at a slight saving in cost.

Chamberlain's Tablets

These tablets are intended especially for stomach troubles, biliousness and constipation. If you have any troubles of this sort, give them a trial and realize for yourself what a first class medicine will do for you. They only cost a quarter.

How's This?
