**DISTRIBUTION IS IMPORTANT**

"Scientific distribution of farm produce is as big and important a factor in profitable farming as scientific production," says C. J. McIntosh, who will bring the policy of advertising produce in the home paper to the attention of farmers at Farmers' week. "Judicious advertising lowers the cost to consumers, favors quicker sales, relieves the already overcrowded transportation facilities of surplus freight, and keeps both money and goods in the home community."

The best known way to build fine community centers will be brought out in the rural life conference at O. A. C. Farmers' week, December 29-January 3. All who love country life are invited to attend and take part in these conferences.

**EDITOR'S RECEIPT WILL DO**

**ENUMERATION BEGINS JAN. 2**

The census is required every ten years by the Constitution of the United States and by act of congress. The date named for beginning the 1920 census is January 2, but the "Census Day" is January 1.

In cities the population enumeration will be completed in two weeks. The enumeration of farms will be completed within thirty days.

The censuses of manufactures, mines and quarries, oil and gas wells, and forestry and forest products will, as a rule, be taken by special agents and by correspondence, and not by enumerators.

The census is the means by which the government ascertains the increase in the population, the statistics concerning agriculture, and the vital information concerning the resources of the nation.
