Deafness Cannot Be Cured
 by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional treatment. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian tube. When that tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.
 We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars free.

of the station loafers but this was a failure because they all said that they couldn't read and all they could chew was Climax and Union Leader. A couple of hayseeds got on and the conductor yelled "Alta-Boart" and made a few gestures with his hands at the engineer, the hobo again got back in the cattle car and the engineer raved back, lunged ahead, bucked a few times and then started down the track.

Meanwhile us "fellers" was about to abandon all hope when we heard shouts and yells and here came a carriage around the corner on two wheels and stopped at the station with other carriages following. The conductor saw that he was going to lose a little business, made a few more gestures at the engineer and the train stopped and then backed up to the station again.

Here came the bride and groom running toward the train followed by people throwing rice, wheat, corn and sawdust on them. The groom had some old shoes tied on his necktie and on the tail of his plaidly coat. Both bride and groom were blushing when they saw us. We heaved a lot of sawdust and shavings at them. They got on the rear coach and after a lot of hissing the train started to leave.

Jim Sneeze didn't know much about weddings and what the old shoes were for so he picked up one of the biggest shoes he could find and shield it at the groom—it got him between the eyes and he staggered, batted his eyes a half dozen times and then fell over the railing on the coach and lighted in the middle of the track on his head. The conductor did not see what had happened and the train

went off sneezing and sizzling down the track with the bride.

The sheriff who was standing by arrested all us boys and took us off to jail. I don't know what they done with the Texas bridegroom but anyhow the sheriff made us spill the beans.

"Well, boys?"
 "Well," says Skinner, "us fellers was kinda spicshus 'bout them Texas guys and so we laid for him. We got Ezra Hampton to play the preacher part; the real one is tied to a tree out at the edge of town and Jim hated to see him get away with it so he hit him with a boot. We been reading about a Texas outlaw who came up north and married a rich girl, then took her money and left her and you know that this guy's from Texas and Jesse's sis is rich and so we did this here stunt to save Jesse's sis."

"Well, I see you boys have been reading bunk literature again. Go home and I'll see you all later," says the sheriff.

Well I know what I got later out in our wood shed and Skinner and Jim can't sit down and so you can guess the rest. Anyhow this Texas guy is a rich cattle man and a good sport; he treated the gang the other day.

O. A. C. HENS SET RECORD FOR EGG PRODUCTION
 A dozen hens at the Oregon Agricultural college's farm at Salem, Ore., have set a new world record for egg production. James S. Dryden, professor at the college, has announced. Each of these hens in one year laid more than 300 eggs, the best producing 330 and two others 323. All of these hens, according to Professor Dryden, are of the strain that several years ago developed Lady McDuff, the first hen to have laid more than 300 eggs a year in a trap nest. Her record was 303.

USING UP THE LEFT-OVERS IN CROQUETTES.

There is a popular fallacy that croquettes are hard to make, chiefly due to the fact that they are always associated with deep fat frying in the minds of most housewives, who are not aware that they may be browned in hot fat in the frying pan instead, and are just as digestible. Chopped leftover meat or fish or canned tuna or salmon may all be used with equal success. Here is a good rule to follow in preparing any kind of croquette:

Mix the chopped meat or flaked fish with $\frac{1}{2}$ the same proportion of cooked rice, moisten well with thick cream sauce, gravy or rice stock, season highly, add just enough fine crumbs to form the mixture into croquettes, roll in fine crumbs and set in a cold place till ready to fry. They are always delicious served with heated tomato sauce.

ECONOMICAL GINGERBREAD

Two and one-quarter cups flour, 1 teaspoon soda, $1\frac{1}{2}$ teaspoons ginger, $\frac{1}{2}$ teaspoon salt, 1 cup light molasses, $\frac{1}{2}$ cup boiling water, 4 tablespoons fat, 1 cup seedless raisins.

Mix and sift the dry ingredients and add the raisins. Pour the boiling water onto the fat and when melted mix with the molasses. Stir into the dry ingredients, beat well, pour into a shallow pan that has been greased and bake in moderate oven 30 minutes.

This makes a fine dessert if cut in squares and served with hot lemon sauce. Stale gingerbread may also be utilized in this way by steaming it for 15 minutes.

WOMEN TO BE INFORMED HOW THEY RATE PHYSICALLY

University of Oregon, Jan. 19.—Each girl student in the university will receive a report on her physique, for her own information and that of her parents exclusively, when a plan just decided on by Miss Mabel L. Cummings, head of the department of physical education for women, is put in operation.

Under the new system, each girl will be surveyed much as the entries in "Better Babies" contests, and the general result will be given to each, showing her how she stands with relation to the general average in physique.
