(By FRED FISK)

"Just to the extent that the citizens of a community take an active interest in the public and civic problems which confront them will that community proper and advance.'

One great problem confronting the people of Lane county today is the road problem. I shall not herein waste time and space on the advantages of good roads, as I believe a majority of the people understand and appreciate their value.

This road problem should be given serious attention, frank and honest discussion, that all may understand the facts of the situation and a majority decide what is best to be done. We must deal in figures and facts and not prejudices and personalities. Under the existing laws and the present method of raising taxes, Lane county with a valuation of \$35,000,-000 can raise approximately \$165,-000 each year for roads and bridges. This amount can be increased by 6 per cent each year under the 6 per cent limitation law. During the year 1920 this amount is to be expended as follows: Retiring warrants \$20.000; bridges, \$30.000; Pacific highway, \$40,000; road districts, \$53,000; searifying and resurfacing. \$5,000; equipment and repairs, \$5,000; rock crusher, \$4,000; weak districts, \$4. 000; Harrisburg ferry, \$1,400; roadmaster, \$2,600. However, the above amounts for bridges, road districts, rock crushers, weak districts, scarifying and resurfacing and equipment and repairs, were this year seriously cut and efficiency hampered in order to pay the \$20,000 retiring warrants and the \$40,000 indebtedness incurred in building the Pacific highway.

Funds Must Be Kept Up.
Of this available fund of \$165,000,
two and one-half mills, or about \$63. 000 should go back to the individual road districts for local expenditures. At least \$10,000 should go back to the weak district fund. Lane county has averaged \$7533 toward this fund during the past four years. Thirty-five thousand dollars should go back to the bridge fund; Lane county has averaged \$35.695 toward this fund
