BONDING WILL GIVE US ROADS

Would You?
If "A" were to undertake the construction of a house without plans, and after a time "B" undertook to carry on the work without any plans and he later turned it over to "C", would you expect a finished product that would be satisfactory in point of design and workmanship and the money employed in its construction judiciously expended?
WOULD YOU?

Do You?
Know that Lane County has been building roads for years and years without any definite plan? Do you know that the Bonding Plan now before the people is the first one that compels a definite positive road building plan regardless of who directs the work and that every cent to be expended in this plan of road work is according to a pre-arranged plan to be approved by the people?
DO YOU?

Are You?
of the belief that an uncertain plan in your private construction affairs, which is beyond question, unwise is any less unwise in public business administration? Are you satisfied to go on building roads from year to year without any definite program in view? Or are you ready to adopt for public affairs the same wise, definite policy you would demand in private affairs?
ARE YOU?

You Are Not
obliged to pay a high rate of interest, as the Bonds draw but 5% and cannot be sold below par. Your tax money is worth 5%. A definite road building plan will be cheaper than a hit and miss plan and will give us roads without an exorbitant tax as the tax amounts to only \$1.67 per year on each \$1000 of assessment. This is cheaper than special road taxes.
ROADS EVENTUALLY—WHY NOT NOW? That we may get the use of them and have 29 years in which to pay for them—during this time they will pay for themselves time and time again.
