TO THE HIGH SCHOOL STUDENTS

This will be the last issue of The News in which the Tattler, the high school students' columns, will appear for several months. We wish to express our appreciation of your successful efforts in putting out the Tattler each week. Your columns have added interest to our paper and you will be missed. The spirit of cooperation has been fine and we shall look forward to the time when the work will again be taken up.

BE PREPARED FOR A FIRE.

Although fires can and do occur at all times of the year, the dangers of fires that will destroy and damage property in the country districts are more numerous in the dry, summer months, especially in timbered districts where slashings are burned and forest fires often become beyond control. Sometimes buildings are destroyed, and sometimes valuable timber is lost. Whatever is destroyed is a loss, which often could have been prevented by being careful and by having had a few simple fire fighting appliances in a handy place in readiness for instant use.

Although insurance will not prevent fires, it should, however, be carried on all buildings that an insurance policy can be taken out on, as one never knows when a fire will occur in spite of all precautions taken to guard against one. After an insurance policy has been taken out on all insurable buildings it should not be allowed to relapse, which has often occurred in instances just before buildings were totally destroyed by fire.

Often when a fire occurs valuable papers, such as deeds and bills, are lost in the fire, as one does not always think about saving them or else does not have the time. If these papers are stored in a safety deposit vault in a bank, they will usually be in a safe place as these vaults are fire and burglar proof. But if these

THEY'LL TOUCH OFF BIG G. O. P. NOISE

When the Republicans gather in Chicago June 12 to nominate a presidential candidate it will be these two men who will "touch off the big fireworks." Senator Henry Cabot Lodge, who has led the anti-treaty fight in Congress, will make the "keynote" speech outlining the G. O. P. platform. Former Senator Beveridge of Indiana will be elected permanent chairman of the convention.

papers are kept on the farm a small metal box or safe can be reserved to hold them. If this box is kept in an accessible place it can often be carried from the building if one has the time after a dwelling is on fire, and if the safe is made of standard material and construction it will pass through a hot fire unharmed.

A little caution will often prevent

a fire from starting. Most fires in residences are caused by a faulty chimney or a faulty stove. Moss on the roofs offers a favorable place where sparks can fall and start a blaze. Hence, cracked chimneys can be repaired; moss can be scraped off the roofs.—Oregon Farmer.

GIVING AWAY OUR MONEY.

We recently heard of a man down in California who committed suicide and left this note:

"I don't know how to spend my money."
 Poor fellow, he must have been insane. He was so crazy that he didn't know that none of us spend our money these days. We give it away. For instance, we hand a grocer 29 to 25 cents a pound for sugar that is worth about 7 or 8 cents a pound. The difference is our gift to the

sugar refiners and manipulators generally. This year we will pay a billion dollars more for our coal in this country. Most of that billion is clear gift to the coal operators who were not only paid the entire principal on their mines and machinery by 200 to 500 per cent war profits, but who stand to make from 40 to 100 per cent dividends in peacetime.

Then there are millions among us who go in for every luxury and foolishness under the sun. The money burns in our pockets. And, too, we have to pay any price demanded for luxuries, that and the other necessity, or supposed necessity, each time making a gift to some big manufacturer or wholesale profiteer who in turn buys \$10,000 automobiles and flings our gift money to the birds.

Oh, no; in these flush times we do not spend our shekles; we give them away!

INDUSTRIAL REVIEW

By efforts of the State Humane society sheep shearing has been delayed about a month and great mortality among lambs prevented.

Approximately \$160,000 has been paid out in state checks to Oregon ex-service men attending Oregon Agricultural college. Estimated 900 men have been benefited.

Electrically operated gold saving machine to be installed on Bridge creek, Josephine county.

Why That Headache?

When you know the cause of a disease a cure may often be effected. This is particularly true of headache. Headache often results from constipation or a disordered condition of the stomach which may be corrected by taking a dose or two of Chamberlain's Tablets. Try it. These tablets are easy to take and mild and gentle in effect.

What's become of the prejudice against automobiles because they frightened the horses

NOW cars are everywhere. The horses have gotten used to them—and so has everybody else. Think of it! This year the American people will spend nearly a billion dollars on tires alone.

Tires are one of the biggest items on the car owner's bills.

Hardly a Saturday, when you motorists drop in to "tune up" for a Sunday trip, that one or more of you doesn't tell us something of value to our business. Sooner or later it comes back to you in Service.

Service is what the car owners of this community are looking for nowadays.

And especially the small car owners, who put service

first in figuring their motoring expenditures.

Just because a man has a moderate-price car is no reason why he should get any less service out of his tires.

We believe that the man with the small car is entitled to just as good tire service as the man with the big car—and both are entitled to the best tire service they can get.

That's why we represent U. S. Tires in this community.

And why more car owners—large and small—are coming to us every day for U. S. Tires.

Come in and talk to us about tires. We're here to help you get the kind of tires you want.

Select your tires according to the roads they have to travel:

In sandy or hilly country, wherever the going is apt to be heavy—The U. S. Nobby.

For ordinary country roads—The U. S. Chain or Usco.

For front wheels—The U. S. Plain.

For best results—everywhere—U. S. Royal Cords.
