SHE DEFEATS ADDING MACHINES IN TEST

Mechanical mathematics has received a jolt. The speed, ease of operation and absolute certainty of correct answer from the adding machine was made to look like a truck-horse, and all by this little 13-year-old Kansas City (Mo.) school girl. Her name is Esther Kaplan. In recent competition there she set an international record as a lightning calculator when she solved six problems in addition in 47 seconds—and the machine with an expert demonstrator took one minute and 42 seconds on the same problems. Four types of adding machines were used against the girl.

RAINY DAYS AND FAIR.

(By a Farmer.)
The farmer as he turns his eye
To the sky,
Looking in vain for a cloud,
Murmurs aloud, We need rain,
It's getting dry;
If it does not come soon
Hay will be short, so will grain.
And the maiden fair,
Oh, I hope it does not rain today
Before the picnic's close,
So we may have a pleasant time
And meet all those
That may be there.
The school boy on his way:
Say, boys, say,
I hope it does not begin
And rain on Saturday
And spoil our play;

We want our team to win.
You are right, we do,
And we will win, too.
How can we sail along
Up on an even plane?
And neither worry nor complain,
Content to live and love the game,
Whether or not God sends rain.

With all his handiary.
So while the Mexie's ship of state
In heavy seas careens,
Let's all watch what he means,
For men may come and men may go,
And new regimies go high or low,
But he's one man in Mexico
Who sure can spill the beans.

Many people of Springfield and vicinity do all their banking business in Eugene when right in their home town they have a national, state, county, and city depository,—the First National Bank of Springfield. Is that the way to build up your home town?

"All right back there?" called the conductor from the front of the car. "Hold on," came a feminine voice. "Wait till I get my clothes on." The entire car turned and craned their necks expectantly. A girl got on with a basket of laundry!
