CONSISTENT VOTING

If the senate is in control of the Democrats, the hands of Warren G. Harding as president will be tied. Senator McNary of Oregon will surely be thrown out as chairman of the irrigation committee, the most important of all to Oregon with its millions of acres of undeveloped land. More than that, all senate committees will be controlled by Democrats.

It will mean that Republican policies, Republican reforms, Republican protective measures for our agricultural products, our lumber, our livestock, our manufacturing will go by the boards.

A vote for Harding should be accompanied by a vote for Robert N. Stanfield, the Republican nominee for United States senator from Oregon.

NINE SADDLES TO THE HORSE

When Thompson's colt swam the river to get a drink of water, that was thought to be about the silliest thing ever. Yet that performance was excelled many times during the late world's war. And it was a man, not a yearling colt, that broke the record. Astonishing things were done, during the war, many of which, doubtless, have not yet come to light.

The government's leather (head) expert ordered 945,000 high grade army saddles for just 104,000 cavalry horses. This is about nine saddles per horse. Just why that expert figures he would need such a backlog of saddles for those horses has never been ascertained, but his mental performance clearly puts him in the same boat with Thompson's colt. See if you can solve the riddle; nobody else seems to be able to.

Again, another leather expert ordered enough harness at one time to require in their construction 300,000 more hides than the government could procure in a year's time.

Still another expert (?) ordered six halters, five nose bags and four covers a piece for those cavalry horses, and another one purchased four curry combs for each of them.

But another "dollar a year" man pulled the biggest "boner" of them all.

He purchased two branding irons a piece for those horses—not the ordinary steel branding irons either, but made of copper and fearfully expensive.

To cap the climax, another expert ordered that the horses be branded on the hoofs, regardless of the fact that the marks would grow out in a few weeks.

Verily, Thompson's colt had plenty of company.

The News is pleased to have in its columns again the Tattler, the high school's department. The students in charge of this work are capable persons and are planning snappy features for their readers. The high school is to be commended for its work of this nature and we solicit for them your hearty cooperation and good will.

FRUITMAN'S HANDBOOK HANDY

"Say, dad, here's a lot of apple leaves all blistered looking. Wish I knew what's the matter with 'em."

"Well, why don't you take a look at your handbook and find out? That's what it's for and you have a copy in your hip-pocket."

"Hadn't thought of it, I guess; I'm not used to having the dope so handy. Here it is on page 29—Blister mites. You spray the trees with lime-sulfur 9-100 just as soon as the leaves fall. Won't have to spray again for three years if we do a good job. Handbook says trees must look like they'd been whitewashed."

"Let's take a look to see if you got it right. Sure, you did. The leaves look exactly like the picture. How did you find it so quick?"

"Why, you see the handbook's in three parts—injury to fruit; to leaves and buds; and to trunks, roots and branches. So I knew we got to look for injury to leaves, on page 19. Then it said, 'A, feeding on buds'; not that, so I jump to 'B, feeding on leaves'; that was it, so I started down, 1, 2, 3, but got only to 1 where it says, 'conspicuous black or red blisters or galls on leaves. Blister mite, page 29'. I was sure it was right but turned to 29 and saw Ful-

ton's picture of apple and pear leaves that looks exactly like the real thing. Pretty nifty, I'll say."

"It's about the handiest thing I ever saw. Anybody that can read and see can tell what's the trouble from every kind of insect I ever saw or heard of in Oregon. Lovett and the experiment station have done fruit men a real service, and everyone of 'em can get a copy of this hip-pocket manual free by simply sending for it to the college at Corvallis."

"I wish ol' Smith 'd get a copy and use it, too," finished the boy. "Guess I'll call him up at noon and ask him to clean up once in his life. It'd help us keep our orchard in better shape."

DETROIT BATTERY SPEEDS UP OLD CAR WITH LESS GAS

A certain car owner of Springfield had been having considerable trouble with the batteries on his old car. Although the car was several years old, it was still in good running order except for the batteries, and he had tried several different makes of batteries without improvement.

He recently learned that Spencer & Anderson were handling the Detroit battery and had heard other auto owners praise this battery. At the garage he was told more about the battery, that it is guaranteed for two years and the garage would give him first class service. "There are two distinct classes of lead storage batteries," said Mr. Anderson "One gives a high instantaneous discharge, such as is required for starting a new motor. Such a battery is of comparatively short life. The second class is that type of battery which will deliver sufficient current to start an engine which has been broken in, and which is so constructed that it possesses extremely long life. The Detroit battery, essentially a replacement battery, is built to stand up an unusually long time under severest conditions."

The auto owner decided to try a Detroit battery and has found it to be entirely satisfactory. He now has no starting trouble and the car runs much better.—Adv.

ELECTRICITY TO THE RESCUE.

The "Electric Home" idea is to be nationalized. Today electric appliances can do the hardest part of the work in the home and have largely solved the servant problem in the cities by doing away with the necessity of help. On the farm it lightens the burdens of the housewife, giving her time for recreation and other duties. It brings many conveniences and comforts to the rural home which are a great factor in causing the

IT'S OLD STUFF

to ask your grocer for a sack of flour, but—

a blended flour at a medium price.

USE HOME PRODUCTS

SPRINGFIELD MILL AND GRAIN COMPANY

younger generation to stay on the farm.

Necessity has always been the mother of invention and in house-keeping electricity has come to the rescue.

The time will come when it will be possible for every farmer and rural resident to have electric light and power in his home and on his farm.

Now that the Columbia River highway is completed down the river to Astoria, a movement is on to get an interior road which will open up the vast territory between Forest Grove and Astoria via Banks, Manning Buxton, Scofield and Vernonia. A Highway association has been organized with 200 members and with local papers boosting the proposition, every effort will be made to get the new State Highway Commission to designate the new route as a state highway. This road would open up a large territory which at present is virtually inaccessible a large part of the year.

Dr. S. Ralph Dippel, dentist, Springfield, Oregon.

NOTICE OF SHERIFF'S SALE ON EXECUTION IN FORECLOSURE

Notice is hereby given that by virtue of an execution and order of sale in foreclosure issued out of the circuit court of Lane County, Oregon, on the 10th day of September, 1920, in a suit wherein on the 19th day of August, 1920, in said court, T. C. Saubert as plaintiff, recovered judgment against the defendant, J. K. Lowe, for the sum of \$271.00 together with interest thereon from the 19th day of August, 1920, at the rate of 10 per cent. per annum, and which amount includes attorney's fees and \$12.50 costs and disbursements, which judgment was enrolled and docketed in the Clerk's office of said court in said County on the 19th day of August, 1920, and said execution to me directed commanding me in the name of the State of Oregon, in order to satisfy said judgment, ~~the~~ est. attorney's fees, costs of suit and accruing costs to sell the following described real property, to-wit:

Lot number thirty nine (39) containing 20.3 acres of Porter Acres as platted and recorded with the County Clerk of Lane County, Oregon, all in Lane County, Oregon.

Now therefore in the name of the State of Oregon, in compliance with said execution and order of sale and

in order to satisfy said judgment, interest, attorney's fees, costs of suit and accruing costs, I will on Saturday the 16th day of October, 1920, at the hour of one o'clock in the afternoon of said day at the southwest door of the County Court House at Eugene, Lane County, Oregon, offer for sale and sell for cash, at public auction, subject to redemption as provided by law, all of the right title and interest of said defendants, J. K. Lowe and George E. Wroe, and all persons claiming by, through or under them or any of them in and to said premises.

Fred G. Stickle,
 Sheriff of Lane County, Oregon.
 10-14-20.

32 Bum Cows Detected

Thirty-two boarder cows were detected and eliminated from the nine cow-testing associations of Oregon in July. The 5671 cows tested averaged 742 pounds of milk with 32.06 pounds of fat for the month, says the report of E. B. Fitts, federal and O. A. C. dairyman. Honor cows—producing more than 40 pounds of fat per month—were 1337. The highest was "Pal", a grade Jersey cow belonging to L. A. Cochran of Tillamook with a record of 107.12 pounds of fat. Pal is in the same herd as "Pennie" who broke the association record in June with 115.66 pounds of fat.

AN HONEST AND FEARLESS DEMOCRAT

It was refreshing to listen to Wm. J. Bryan at the Democratic National Convention. There may be little he said with which we agree; but at least he had his say. He stood before a hostile convention, spoke his heart; and while the delegates stolidly voted against him, he moved the galleries to the one genuine demonstration of the gathering. When a man stands his ground in the face of newspaper ridicule and organized opposition, and preaches the faith that is in him, he commands the admiration and respect of those who love courage and free expression. Mr. Bryan represents a dwindling few in our national life—those who yet believe in the American right of free speech and frank discussion. In battling for his principles, openly and courageously—although our views may be at variance with his—Mr. Bryan performs a real and a much needed service in our politics.—Senator Hiram W. Johnson in September Sunset.

Perfect's Band and Orchestra School

ALBERT PERFECT Mgr.

Instructions given on all Band and Orchestra Instruments

All students are invited to join any of the following organizations maintained in the school:

JUVENILE BAND

For boys from 8 to 12 years of age

LADIES' BAND AND ORCHESTRA

YOUNG MEN'S BAND

(To gain experience necessary to enter professional organizations)

BRASS AND SAXAPHONE QUARTETTES

ADVICE TO PARENTS

Mr. Perfect will be glad to assist in selecting instruments to which the students are best adaptable
