Are You Sharing the Big Drop in Prices?

Here is a Confidential Talk to the Public:---Believing that prices have been reduced to a place where they will remain for a few months, I have taken this opportunity to reduce mine also.

Regardless of the old wholesale prices I have cut all prices to correspond with the prices prevailing today. *Remember this is not a sale. The prices are fixed for the present cuts in MEN'S WEAR and SHOES.*

If you take particular NOTICE of my PRICES which are not SALE prices and compare them with some of the alleged sales that are being pulled off you will notice that I am still low man.

These prices have not been touched yet for the simple reason that I'm not afraid to take the present drop in prices, and then, anticipate for the spring Prices, and have taken the future drop also, which is bound to come.

You are safe in dealing in this store as any drop that may occur will go into effect as soon as quoted. It is to my interest to give the public a square deal and I've given my stock a thorough going over and reduced everything as low as possible; in fact some things that I do not intend to replace this winter are cut way below the present cost.
