We help the appearance of women. Twenty-two inch switch or transformation, value \$7.50, price \$2.45.  
400 to 412 Dekum Bldg.

A METROPOLITAN newspaper recently featured the photographs seen in a trip around the world.

They were as follows: The Great Wall of China, a group of figures outside a Buddhist temple to frighten away evil spirits, the houseboats on the canal at Canton, China, the ancient instruments in the astronomical observatory at Peking, the bank of the Nile near Cairo, where, according to local tradition, the daughter of Pharaoh found the infant Moses in the bulrushes.

The interests of this traveler were apparently confined largely to the Orient or else he traversed the most of his journey with his eyes shut, a fault common to a good many travelers.

What are the five most interesting examples of the handwork of man to be seen in a trip around the world? What are the five things most worth seeing and remembering?

What would interest one would not, perhaps, interest another, and the list which is given below may not appeal to you even though it be an opinion compiled from the experiences of a dozen or more world travelers who discussed the interesting question.

Here are the things which were in general agreed upon as the five things most worth seeing:

The Taj Mahal at Agra in East India. This is undoubtedly the most wonderful example of architecture in the world. It was built by Shah Jehan to his favorite sultana, Mumtaz-i-Mahal, and the romance of its building. If you will take trouble to look it up in the library, you will find extraordinarily interesting.

The Vatican at Rome. No building in the world houses so many unreplaceable treasures as the Vatican. Its art riches, its wealth of literary treasures exceed in interest and in value any other single collection ever made.

The Mount Wilson observatory, near Los Angeles, Cal. It is in this observatory that is housed the 100-inch Hooker telescope with pierces further into the unknown of space than any other instrument that human hands have devised. One moment's look through that magnificent instrument would show you a new universe which before it was built had never been seen. It is one of the scientific wonder spots of the world.

Shakespeare's home at Stratford. It was here that the master of all writers retired after he had finished the greatest contribution to literature ever written in any language or by any man. It is an inspiration to stand where he had once stood, to see some of the material things that were once his companions.

The Panama canal. Undoubtedly the greatest example of man's engineering genius since the world began. There may have been greater difficulties to surmount in the building of the pyramids but they are useless things, not so wonderful now as a modern city skyscraper.

All five of these things are the accomplishments of the brain of man. Added to them the traveler around the world would wish to see those other and greater things that man has never equaled: The falls at Niagara, the Grand canyon, the mighty trees of California, the great tides of Fundy, the caverns at Luray, the mountainous monuments of God in the Alps and the Himalayas, the supreme beauty of Lake Louise or the Bay of Naples.

To the traveler there is given the great privilege of seeing with his own eyes but even if you cannot travel, the beauties and the wonders of the world are not denied you. You can see them through the eyes of others who have seen them and have written down in graphic and truthful language the wonders that they found.

If you are interested in any of the five things of man enumerated above you can find them all interestingly written about in any good library, and of the greater things in nature hundreds of books have been written on each of them.

## GOOD HIGHWAYS

### ONE-MAN ROAD GRADER PAYS

Profitable Plan for Farmers in Community to Get Together and Purchase Implement.

Once two teams of horses and at least two men used to be required to level and grade roads. Now we have the one-man machine, which does the job in half the time and never gets tired. Like all modern devices of this nature, it is, of course, driven by gasoline.

The single operator manipulates all the levers that control the cutting blades and also takes care of the engine. All the controls are placed at his elbow.

If you live in a community where it is the custom for each man to con-

Gasoline-Driven Device Saves Time and Labor.

tribute his share of labor toward keeping the roads in condition, it will pay the men of the neighborhood to get together and purchase a one-man road grader and reduce the time and labor ordinarily necessary for this task.—Popular Science Monthly.

## BETTER ROADS HELP BABIES

### Farm is Made More Accessible to Doctor and Nurse—Danger in Travel is Reduced.

It may seem a long way from good roads to better babies, and yet the two are closely connected.

America has a great rural population, throughout which babies are being born every day.

These babies and their mothers need care, the visit of the nurse, the services of the physician, often of the surgeon, and how are they to have it if between lie miles of road impassable alike to automobile or buggy?

Of what use is the little hospital at the county seat if the woman whose life depends upon its care cannot be taken there swiftly and comfortably?

What difference does it make that the town physician may be a very wizard at treating diphtheria, if long before he can arrive at the farm the little throat has been closed by the deadly film, or the little heart stopped by the depressant poison?

Medical and surgical honors are generally claimed for the city—when as a matter of fact the country doctor is often possessed of a skill as complete as his heart is big.

Make the farm accessible to the doctor and nurse, make the hospital and the health center accessible to the farm. Nature and skill will do the rest.—Concord Monitor.

## THIN ROADS ARE EXPENSIVE

### Ordinary Rock Surface Under Motor Traffic Coming in Next Few Years.

MacAdam was years ahead of his age and years behind this one. The builders of the Appian Way knew more about building a road for a motortruck than MacAdam, strange as it may appear. It is the general opinion among road builders—an opinion greatly quickened and altered by the war—that the light stone road, be it surfaced or oil treated in what way you will, is not the road to build in the face of an avalanche of motortrucks that is coming in the next few years. The motorcar brought oil to the road as a necessity. The water bond, which worked so well with iron tires and iron shod hoofs, is useless against the suction of the pneumatic tire. But the oiled stone road that holds the 3,000-pound car with ease will not carry the five-ton truck—and last.

The railroad builders have found that for heavy traffic it pays to use the heaviest steel rails, the finest wood for ties and the best broken stone, and plenty of it, for ballast.

## WM. ROGERS & SON SILVERWARE

Famous for More Than 50 Years

## Skin Troubles With Cuticura

Soothed With Cuticura  
Soap, Ointment, Talcum, etc. everywhere. Samples free of Cuticura Laboratories, Dept. X, Malden, Mass.

Seat of the Trouble.  
Herbert often complained about the peculiar disposition of his small cousin, with whom he could not get along well. After a recent disagreement he came into the house out of patience and exclaimed: "Well, mother, James and I might just as well quit trying to be friends, if he is my cousin. We just can't agree. He's too full of human nature."

Original "Humpty Dumpty."  
The original of the Mother Goose melody was a satire on James II of England, who fled for aid to the court of Louis XIV of France, then the most powerful monarch of Europe, but "all the king's horses and all the king's men couldn't put Humpty Dumpty together again."

Wanted Prolonged Stay.  
Much to his delight, Bennie had been allowed to spend the night with his grandmother. Next morning when the time came for him to return home he said: "Grandma, I am not ready to go home yet. I want to stay two all nights."

The Real Bungalow  
A bungalow, properly speaking, is a long, low, rambling, one-story wooden building, with wide eaves, serving as a rest house and shelter for travelers, in India, where there are no other accommodations.

Demonstrated.  
"Flattery," says the office philosopher, "is a species of eyewash which we use on our next-door neighbor. But, of course, he never tries it on us; he tells us he has too high an opinion of our judgment to do that!"—London Answers.

Shave With Cuticura Soap  
And double your razor efficiency as well as promote skin purity, skin comfort and skin health. No mug, no slimy soap, no germs, no waste, no irritation even when shaved twice daily. One soap for all uses—shaving, bathing and shampooing.—Adv.

Etiquette.  
The word etiquette meant a label. The garden walks at Versailles were labeled and the courtiers had to keep within the "etiquettes" or labels. The meaning of the phrase was afterward widened.

In a Breach of Promise Case.  
An eminent French scientist has succeeded in weighing a kiss. "Oh, fudge! the only thing that can-possibly worry a man in that line is how much his kiss weighs with the jury."—Boston Transcript.

Are You Satisfied? BEHNKE-WALKER BUSINESS COLLEGE is the biggest, most perfectly equipped Business Training School in the Northwest. Fit yourself for a higher position with more money. Permanent positions assured our graduates. Write for catalog—Fourth and Yamhill, Portland.
