In order to appreciate the great bargains we are offering call at our Springfield mill and inspect the lumber in the piles. This list is far from being complete, but is intended to give you an idea of what you can buy for very little money if you act quickly.

These Prices Are f. o. b. Mill and Effective Until Nov. 1st.
CASH ONLY

In addition to this special list of lumber we have a good stock of our regular grades, including Flooring, Rustic, Ceiling and Dimension in all sizes and lengths at correspondingly low prices. Save money on your lumber needs during this big sale.

THE BOOTH-KELLY LUMBER CO.

Edited by the Pupils of Springfield High School

Not of little interest to the patrons of the Springfield high school is the fact that the new building is now being occupied. Although it is not completed the students are willing to undergo any little inconvenience which may arise, just to be in the new school.

The cement walks not being laid and the muddy ground over which they had to pass, did not lessen the enthusiasm of the students as they marched to procure a seat in the new building.

It mattered not to them if they had to use the rear door as a main entrance; their one thought being, "Just to be movin' into the new building."

The students wandered aimlessly through the new school until they reached the head of the stairs where they were met by Supt. Roth, who assigned them to their rooms.

The pupils have looked forward with anticipation and pride in occupying the building. This will probably be the first and only time some of the students will experience the saying, "out of the old building into the new."

Mr. McFadden, teacher of Physics and Biology, graduated from the University of California in 1920. Last year he was engaged in the extension division of the University of Nevada. He is now studying law in the forenoon at the University of Oregon.

Mr. McFadden is the Junior class advisor, and also the football coach.

Mr. Morgan, who is to teach in the Springfield high school has just arrived from Laurel, Washington, where he has been superintendent of schools for three years.

Mr. Morgan is a graduate of Washington State college.

A meeting of the girls wishing to take domestic science and art was held today in Mr. Roth's room.

There were twenty-nine freshman girls present beginning new work, besides upper classmen wishing to take advanced work.

There is also a senior boy's class in cooking.

There are three rooms for the domestic science and art department.

the domestic science laboratory, art laboratory and lunch room.

The domestic science laboratory has a new range with electric plates. The old desks which were enameled white last year are to be moved to this building this week.

The domestic art laboratory had been supplied with two new ironing boards, two electric irons and three sewing machines. The first class is to be held Monday.

Mrs. Ethel Myers, instructor in English and girls athletics, was recently an instructor in physical training at the Y. W. C. A. in Eugene.

She graduated from the University of Oregon with the class of 1920, and taught one year in the high school at Ontario, Oregon. From there she went to Chicago and took a course at the American Physical Training school.

On her return to Oregon she secured a fellowship at the U. of O. for one year. At the end of that year she became a physical instructor at the Y. W. C. A. in Eugene.

Last year she decided to change her vocation and teach school, so we now find her with us at the Springfield high school.

The football players of Springfield high school are practicing hard.

The well liked coach, Mr. McFadden is working wonders among the raw football recruits. They intend to give Harrisburg and Junction City the surprise of their lives when they meet them on the field.

To Gain a Good Reputation.

The way to gain a good reputation is to endeavor to be what you appear. That is precisely the manner in which Chamberlain's Cough Remedy has gained its reputation as a cure for coughs, colds, croup and whooping cough. Every bottle that has ever been put out by the manufacturers has been fully up to the high standard of excellence claimed for it. People have found that it can be depended upon for the relief and cure of these ailments and that it is pleasant and safe to take.

RAILROAD RETURNS ARE NOT GUARANTEED

Finding that there still exists an impression that the government guarantees the railroads a six per cent return, the association of railway executives has issued the following statement:

"The idea that the railroad management have guaranteed to them a 6 per cent return and have therefore no incentive to economy, is absolutely untrue."

Since September 1, 1920 no railroad could receive what it did not earn. Since that time the railroads have

A Good Physic

When you want a physic that is mild and gentle in effect, easy to take and certain to act, take Chamberlain's Tablets. They are excellent.

failed to earn a 6 per cent return by \$518,000,000 and have lost that sum forever.

In this period of readjustments the railroads are taking their losses just like everybody else—only they have no wartime surplus to take it out of. Unlike many other industries, they accumulated no large surpluses because they were restricted under government control to the same net return they earned in the three years before the United States entered the war.

A case in operating expenses sufficient to make possible a general reduction in rates can be secured only by further substantial reductions in railroad operating expenses—including the abolition of wartime rules and working conditions so that the amount of work per day of each

railroad employee will be something near what it was before the war."
