Your Teeth

(By Rea Procter McGee, M.D. D.D.S.)

HEAD INFECTIONS

The great majority of bodily infections are due to abscesses in some part of the head, usually in the mouth, throat, nose or in the little cavities that are located in a chain from the base of the nose backward to the under surface of the skull.

These cavities are called sinuses. Whenever there is an abscess that causes absorption of the poisonous material into the blood stream, it is called a focus—a focus of infection.

The reason that so much attention is given to mouth infections is not because they are worse than any other infections, but because there are so many opportunities for infection in the mouth.

There are twenty temporary teeth which, in the normal course of life, are followed by thirty-two permanent teeth. Consequently, every one of us has the possibility of fifty-two sources of infection in the mouth alone, un-

less the teeth, both temporary and permanent, are properly cared for.

Every infection shortens life either very slightly or very considerably. In order to keep a clean blood stream, points of infection must be removed, but how much better it is, and how much more sensible it is, to avoid these infections.

So far as the mouth is concerned, infection can almost always be avoided by proper care, in time.

The best time to begin preserving your health for the future is now. Just think of the wonderful opportunities ahead of us in this country. Only those who have health and energy can have the success of which they are capable. Pus is the enemy of success.

TOWN AND VICINITY

Word comes from Mr. and Mrs. Andy Cofer, formerly of Springfield, now of Oakdale, Washington, of the death of their 5 year old daughter, Neia, on February 3. The little girl was sick ten days with sleeping sickness. She was taken to Spokane for treatment, but it proved useless. Word has been received later that Mr. Cofer

Edited by the Pupils of Springfield High School

S. H. S. has Distinguished Visitors.

Springfield High school had two distinguished visitors last Friday in the persons of State Supt. J. A. Churchill and County Supt. E. J. Moore. They came here with the expressed intention of inspecting the new High school and were very pleased with it, particularly admiring our assembly hall.

First Grade Occupies Room in H. S.

A division of the first grade from Lincoln have come over to teach the High school students how to behave. They are occupying one of the old study halls. Mrs. Lambert, their teacher, said they liked our building very much.

Gone—But Not Forgotten

Of course we students of the Springfield High school are dutifully thankful for our new building and all its many conveniences; but when the end of the semester draws near and the freshmen from Lincoln arrive, how we wish we had back the old pump that never once shirked its duty when it came to ducking "Frosh".

But freshmen don't think for a moment that we can't wet your pompadour just the same. There are some good faucets in the building, you know.

When school opened for the new semester Monday last, there were 94 pupils out on account of sickness, 73 in the Lincoln school and 21 in High.

Asabel Fish, one of the prominent members of the High school, has been quite ill with the "flu" for a couple of weeks. We hope to see him with us again soon.

Ester Lee could not be with us for a few days because of the illness of her mother.

The new "frosh" have the same wise look that all freshmen try to put on. But there is no use of them trying to act as if they had been here long time for that is just wearing the little sign: "I am a frosh".

Poor Viola, Bun isn't able to come to school. We understand clearly why she always has such a very wry face.

Will the finder of a thermometer please return same to the undersigned and receive reward?

(Signed) J. E. Torbet.

Ruth Brattain (a new frosh) is trying to get strings on Ivan Cowart. Keep trying little one and maybe you'll succeed.

Says the shoe to the Stocking, "I'll rub a hole in you". Says the stocking to the shoe, "I'll be darned if you do".

We hope the frosh enjoy themselves. The seniors have lots of fun watching the freshmen's green actions.

is still confined to his bed since the recent bereavement.

A. C. Thompson, right-of-way man for the California Oregon Power company, was in Springfield on business in that line the first of this week.

Mr. and Mrs. R. H. Shultz moved from Springfield to a farm near Gasden last fall. Mrs. Shultz came in today to subscribe for The News, to keep in touch with the affairs of the old town.

Walter F. Lipes, a workman on the S. P., who was injured about the yards here about two months ago has effected a settlement with the railroad company for his injuries. The amount is stated by his friends to be somewhere about \$1200 or \$1500. The American Legion and the Elks rendered financial assistance during the time of his disability.

Prof. Albert E. Powers, assistant director of the extension division of the university, is to address the Springfield schools on "The Seven Ages of Washington", next Wednesday, February 22.

The "flu" epidemic has made a decided and embarrassing shortage in both the sawmill force and the school attendance at times in the past two weeks.

An infant son of Mr. and Mrs. Arthur Dickens died at Mercy hospital, Eugene, Saturday, February 11.

Dr. S. Ralph Diggle, dentist, Springfield, Oregon.

You will see Christians devoured by lions; see Ursus the giant, crush a savage bull to earth; see the mighty

Mr. Morgan (in physiology): "Why is it that the blood rushes to my head when I stand on it, but when I stand on my feet it doesn't?"

From the rear of the room: "Because they aren't empty!"

Carl Lewis is very changeable in some things especially girls.

Some very pale faces were seen Monday morning when the grades were posted.

"It was a great surprise to see Alfred Townsend walking home with Mable McPherson". Evidently the person who said this had not been watching behind the scenes as "Engaged by Wednesday" was practiced.

Student in English exam: "I thought I was going to flunk when I came in here—now I know I am."

We, the pupils of S. H. S. are sorry to see Messrs Harbert and Davis leave school, because the girls are running around like a bunch of sheep without a shepherd.

In the play to be pulled off in the future Lord Brattain with his monocle is going to have all the girls in school in love with him.

Harry H. said he was going to quit school but we notice that he is back again today. We knew he couldn't stay away from S. H. S. very long.

I don't think Adelaide and Ralph will get much typewriting done because they both take it the same period and out of the same book. I wonder if they sit on the same chair and use the same machine?

In Biology—Mac: "If flies carry disease germs on their feet what is the best thing to do?"

Student: "Cut off its feet."

Valentines! Wonder who got the Ace of hearts? It proves to be the best after all.

We hope the new freshmen will get their share of water.

Alene Larimer has a very sad look this week. Belmont's face is absent from school. (News editor's note: we wonder where the rest of him is).

We wonder whose lap Alfred T. was sitting on in the library last week? Ask Ester F. for inside information.

Another romance in school. We were surprised to see our "finest" girl and "handsomest" boy conversing all of one period in the hall.

The new frosh think they will not need to have their heads washed for some time.

I think the school ought to donate an alarm clock to Polly Briscoe and Winnie Long so that they could get to general science some morning on time.

Roman chariot races, the ancient tradition of gladiators fighting and slaying each other in "Quo Vadis" at Bell Theatre Sunday.

Start the morning right with a wholesome dish of Jasper's Breakfast Graham. Sold by leading grocers.

W. O. W. meets every Tuesday evening at W. O. W. hall.

EASY STARTING AID INSTALLED BY S. P.

In order that trains may be started more easily, without jolting, and with less fuel, locomotives on Southern Pacific lines are being equipped with "booster trucks" according to an announcement by J. H. Dyer, general manager of the Pacific system.

These "booster trucks", the latest thing in locomotive efficiency, are operated by two small steam cylinders so constructed that they transform the two rear trucks of the locomotive into driving wheels. In this way the locomotive power is increased about 20 per cent in starting and enables it to make a smooth and even start.

After the train is in motion and a speed of about fifteen miles an hour is attained the "booster" is automatically cut off and the trucks operate solely as trailers.

According to Dyer, all locomotives both freight and passenger, will, in the future, be equipped with these trucks.

FARM REMINDERS

Early spring seeding of grain gives the best results, but when planted in rather cold soils the rate of seeding

NOTICE!

I have bought the business known as Lemley's Cleaning and Pressing parlor and will endeavor to give perfect satisfaction to all those who patronize me in the future.

The telephone number is 61 and if YOU have any cleaning, pressing, dye work or repairing to be done just call that number and it will called for and delivered promptly

The samples for spring and summer suits have just arrived. Come in and look them over.

Walter N. Gossler

should be increased. Spring oats should be planted not less than three bushels per acre, and spring wheat and barley at about two bushels per acre for western Oregon conditions.—O. A. C. experiment station.

Why not set eggs from a selected flock of the best hens rather than from the whole flock? Wouldn't it pay to raise the average production of the flock two or three dozen eggs per hen? Try it.—O. A. C. experiment station.

Cannery men to the number of nineteen who have come from points in Oregon and Washington all the way from Olympia to Medford are enrolled in the canner's course now being given by the department of horticultural products at the Oregon Agricultural college. The men are enthusiastic over their work, says E. H. Wingard, who is giving the course. The course includes practical work in the well equipped laboratories and lectures, many of which are given by men brought to the college for this special occasion.—O. A. C. experiment station.

NOTICE FOR PUBLICATION

U. S. Land office at Roseburg, Oregon, January 19, 1922.

Notice is hereby given that Ray O. Rennie, of R. F. D. No. 2, Springfield, Oregon, who, on May 10, 1920, made homestead entry, serial No. 012510, for the S½ of S½ of section 17, township 17S, range 1W, Willamette Meridian, has filed notice of intention to make final three-year proof, to establish claim to the land above described before E. O. Immel, U. S. Commissioner, at his office at Eugene, Oregon, on the 3rd day of March, 1922.

Claimant names as witnesses: James N. Hill of Route 2, Springfield, Oregon; Oscar Millican, of Route 2, Springfield, Oregon; C. R. Mead, of Route 2, Springfield, Oregon; William M. Rennie of Route 2, Springfield, Oregon.

W. H. CANNON, Register.

More Refrigerator Cars for Pacific Fruit Express Company

Bids for the construction of 3300 refrigerator cars for the Pacific Fruit Express company, for 1922 delivery, have been requested by the company in the east, according to Southern Pacific company announcement. The Pacific Fruit Express company is owned jointly by the Southern Pacific and the Union Pacific. The cost of the cars will be in the neighborhood of \$13,000,000, bringing the investment in new equipment and facilities since 1920 to \$33,000,000.

The Pacific Fruit Express company since 1920 has expended \$16,000,000 for new equipment and \$4,000,000 for new and enlargement of existing icing facilities. The company last

year received 4000 new refrigerator cars.

It was stated at the local offices of the Pacific Fruit Express today that the new equipment is necessary in order to handle the increasing shipments of perishable commodities, and that it was decided to contract for the cars in preparation for the next fruit season despite conditions in the transportation industry which cause capital expenditures to be held to the minimum.

The new cars, it is anticipated, will be completed in time for the summer perishable business. The company, at present, has 19,500 refrigerator cars, and with the new equipment now being ordered will have 22,800 refrigerator cars.
