TOWN AND VICINITY

Mrs. Roy White of Portland is here for a couple of weeks with her parents, Mr. and Mrs. W. A. Lambert. Another daughter of the Lamberts, Mrs. Earl Baldwin, of Eugene, had the misfortune to break one of the bones in her hand Monday. A local physician reduced the fracture.

Mr. and Mrs. Elmer Ferguson, of near Goshen, were in town Wednesday.

Mr. and Mrs. C. G. Hemenway, who have been living on the corner of 6th and A streets, have moved to Creswell.

Mrs. B. A. Washburne has been quite ill for several days, but is now much better.

Dr. S. Ralph Dipple, dentist, Springfield, Oregon.

Ivan Male is taking the place of Henry Korf at the Springfield garage this week.

Mr. and Mrs. Jess Seavey, Welby

Stevens and Henry Adrian drove up to Lowell bridge Wednesday morning and fished down as far as Jasper. One report is that they caught 78 and another 69 trout. We will have to ask Mrs. Seavey.

FACTS AND FIGURES ABOUT DOUGLAS FIR

From an extensive survey of the commercial woods of the Pacific coast and other facts and conditions relating to the timber and lumber industries of the Pacific coast, in the April issue of The Timberman, of Portland, the leading journal of these industries in the Northwest, we gather these interesting facts relating to Douglas fir and the part it bears and will bear in the years to come in these important industries:

Douglas fir, sometimes called Douglas spruce, yellow fir, red fir, Oregon pine or Washington fir, is the most abundant and largest tree in Oregon and Washington, where it

S. H. S. TATTLER

Polly Driscoll and Esther Lee received typewriting certificates. The former from the Remington company, the latter from the Underwood company. We always knew a girl's tongue could make speed, but we were not so sure about her fingers.

The juniors are planning to decorate the banquet table at the reception with "bleeding hearts." They seem very sad to see the seniors leave but this does not seem to be prevalent in the faculty.

Some of the teachers of the training class have finished their practice work and are planning on how they will take charge over some little school away back in the mountains forty miles from no where.

Aleene Larimer spent the weekend with Margaret Russell.

The domestic art girls are busy making their organdie dresses. In a couple of weeks they are planning an exhibit of both sewing and cooking, along with the boys manual training exhibit.

Lyndel G. has quite a hard time cranking Abbie's Ford for her. First he cranks then jacks up the rear wheel then cranks again.

Charlotte is now wearing a new ring bearing the initials C. H.

Who put this in? "Have you got a date with anyone next Saturday night?"

"Leve et tu the juniors, when et comes to givin' fides." That will be the senior battle cry in the morning after the night before.

C. S. has decided to become a hair dresser. She was practicing on Bun's hair the second period.

What's going to happen? Lolo studied a whole period today.

At last our student body president has fulfilled his promise. He has a girl.

We wonder how the 3:15 to 4:00 o'clock period is progressing.

Mrs. Mary Imhoff, aged 68, died at the Mercy hospital Tuesday, May 20. Mrs. Imhoff is the mother of "Hank" Imhoff, manager of the street carnival that is showing here this week. Besides her son, she has three daughters, one of them, Mrs. Libby Bolto, of Wichita, Kansas, being with her at the time of her death. The funeral will be held at the Mercy hospital today at 4 o'clock and the body will be sent to Wichita. Gallstones was the cause of her death.

forms the major part of the dense stand of timber found on the west slope of the Cascade mountains. Its range varies in altitude from sea level to about 6000 feet. In soil to its liking, it ordinarily reaches 150 to 190 feet in height and 3 1/2 to 6 feet in diameter. Rather frequently trees over 200 feet tall and 8 to 10 feet in diameter are found.

The northern limit of the range of Douglas fir is in the vicinity of Tacla lake and Skeena river, British Columbia. Its southern limit is not well known, but it has been found in Mexico. The region of its best development is on the west slope of the Cascade mountains, but in the states of Idaho, Montana, Wyoming, Colorado and New Mexico it is cut to some extent, but the lumber is of poorer quality and grade.

Those conversant with standing timber in the Douglas fir region consider 35,000 to 40,000 feet board measure per acre as being average, although occasional stands of 100,000 feet per acre are found.

With the decline of the southern pine cut it is expected that the production of Douglas fir and associated species will be increased. At this time there is more lumber cut from Douglas fir each year than from any other one species.

The estimated present stand of Douglas fir, in millions of feet, board measure, in the principal fields of its production, is as follows: Oregon, 255,342; Washington, 132,051; California, 85,000; British Columbia, 76,573; Idaho, 20,781; Montana, 12,100.

The calculated production of Douglas fir in five recent years, in Oregon, Washington and the whole United States, is given below, in thousands of feet, board measure. In 1916: Washington, 3,546,532; Oregon, 1,572,459; U. S., 5,413,431. In 1917: Washington, 3,320,044; Oregon, 1,759,044; U. S., 5,351,025. In 1918: Washington, 3,579,132; Oregon, 1,989,954; U. S., 5,820,000. In 1919: Washington, 3,627,000; Oregon, 1,990,000; U. S., 5,902,200. In 1920: Washington, 4,275,124; Oregon, 2,347,850; U. S., 6,960,000.

These figures show that, while Washington has largely led in production in these years, Oregon has now nearly twice as much standing fir as Washington, three times as much as California, three and one-half times as much as British Columbia and nearly as much as all of them together; and must, not many years hence, become the chief source of supply.

North Bend.—North Bend Mill & Lumber Co., puts on double shift.

Dallas.—California Packing corporation erecting \$4,500 pruned dryer.

Electric railway to be extended from Milton to Umapine.
