IT PAYS TO CONTINUE TESTING OF DAIRY COWS

As a result of the study of records of cow-testing associations in all parts of the country, the United States Department of Agriculture has shown that in well-managed associations there is a gain in the average yearly production of cows from year to year. In other words, even though the poor cows are culled out at first, it pays to keep everlastingly at it, as there is always an opportunity for profitable improvement.

To illustrate this, figures of butterfat production for three associations, one each in Michigan, Ohio, and Pennsylvania, show that for the first year the average per cow was 237 pounds, for the second year it was 255 pounds, for the third year 278, for the fourth 292, and for the fifth year 305 pounds. The last year in the series showed an average production of 68 more pounds of fat than the first year. At 40 cents a pound this amounts to \$27.20 a head, and for a herd of 29 cows the increased value would be \$544 a year.

Production records of 17,405 purebred grade, and scrub cows showed that in milk production the purebreds and grades excelled the scrubs by 12.42 per cent, and in butterfat production by 17.86 per cent.

400 HEAR LAST LYCEUM DRAMATIC ENTERTAINER

An audience of over 400 heard the dramatic performance of Emma Dee Randie, entertainer from the Ellison White lyceum bureau, which was staged Tuesday night at 8:15 in the high school auditorium under the auspices of the 4 L's. A number of Springfield's representative men were the object of some pleasanties which furnished entertainment for the rest of the audience.

The next lyceum number will be a lecture by Dr. Mattison Wilbur Chase on "Neighbor Study" as an aid to self-understanding. Dr. Chase's theory is based on the words of Socrates, "Know thyself," and on the line from Alexander Pope, "The proper study of mankind is man." Dr. Chase's lectures are said to be abounding in human interest, with good old-fashioned logic and "horse sense," rather than the modern "isms." He is known for his humor, and his sympathetic viewpoint of humanity.
