Thrifty Tips FOR THE HOME By FLO

Mahogany: A very fine polish for mahogany is made by mixing a tablespoon of olive oil with a teaspoonful of vinegar. After dusting well, apply the fluid with a piece of soft flannel. Then polish with a clean, soft duster.

Cocoa: If a pinch of cloves is added to cocoa when making a cake it will improve the flavor.

Hair Brushes: If hair brushes are washed with soda instead of soap, the bristles will remain stiff and white. Soap softens the bristles and does not clean as quickly as soda.

Teacups: If your teacups are badly stained, try washing them in a mixture of salt and vinegar. It will remove all spots.

Stockings: The colored silk stockings that are so popular now sometimes look very faded after washing. To avoid fading, use one tablespoon of borax to each two quarts of warm water. Wash quickly and rinse thoroughly in clear water. Do not hang in the sun.

Clothes: If clothes are sprinkled with warm water instead of cold they will be ready to iron in a few moments. Roll them tightly in a damp towel and iron in ten or fifteen minutes.

Burns: It is a good idea to keep a solution of alum and water bottled in case of burns, etc. If applied at once, this solution will prevent blistering and also relieve pain quickly.

White Stockings: If white silk stockings are washed and dried at night they will not turn yellow as quickly as they will if they are dried in the light.

Sausepans: After cooking oatmeal the pan can be very easily cleaned by filling with very hot water. Empty the hot water and fill with cold. The oatmeal will fall away from the sides.
