COLLEGE TO BROADCAST FROM OREGONIAN STATION

An agricultural and educational radio service will be broadcast by the O. A. C. Extension service from the Portland Oregonian station every Tuesday evening at 8 o'clock, till further notice. Two 15 minute lectures on general farm, truck and backlot garden and general educational subjects, by extension, experiment station and college specialists, will constitute each program.

"College by radio has passed the fad stage and is now recognized by the extension service as a modern utility," says the announcement. "Inquiries of 1500 listeners by the Oregonian showed that more than 25 per cent of them are interested in agricultural lectures, and 196 radio owners out of 200 in rural districts, queried by the extension service, want the agricultural lectures continued."

FEEDING SEEDS TO HUNGRY SQUIREL AND CHIPMUNK

Flagstaff, Ariz.—At the Southwestern Forest Experiment Station tests of the appetite of the average Rocky Mountain mantled ground squirrel and the San Francisco mountain chipmunk show an astonishing capacity for pine seeds. The ground squirrel will eat 340 pine seeds in one day and night, while the chipmunk accounts for 237.

Dr. Walter P. Taylor of the Biological Survey, who is conducting the tests finds that a group of four seed trees in an acre of cut-over western yellow pine land would produce about 92,000 seeds in a good year. This would be just enough seed to carry one family of squirrels and three families of chipmunks about two weeks. What the rodents are going to do for the remaining 50 weeks, or what they do in a poor seed year, does not appear. But in a good year at least, they very seriously interfere with the natural reforestation of western yellow pine.

The Southwestern Forest Experiment Station has been advocating the leaving of four mature trees in every acre cut over, to provide seeds for a second growth of pine. It would appear questionable whether four seed trees to the acre are sufficient to do more than win the grateful appreciation of resident squirrels and chipmunks, were it not for the young pines that actually do come in on these cut-over areas in defiance of biological statistics.

TELLS HOW TO VOTE ON INCOME TAX BILL

At the county meeting held at Lorane October 16 Hugh Earl, of Eugene, gave a talk on the Income Tax measure making clear the following points: The measure to be voted upon this year is a repeal and in order to retain the income tax law the voter must vote 313 No. From all indications the law has not driven out capital as both foreign and domestic corporations have increased in number since 1922. The income tax collection will be \$2,250,000 instead of one and a quarter million as predicted making the percentage of reduction to Oregon's tax-payers approximately 3 per cent. This does not mean that a tax-payers tax is 3 per cent lower than last years tax for in many cases the county, city or road taxes has absorbed that 3 per cent. But it does mean that state taxes would have been 3 per cent higher if it were not for the income tax. The income tax is a just tax letting the man who is making money help the farmer and property owner share the tax burden. The income tax has reduced the state taxes of Lane county \$51,000. Vote 313 No.
