THURSDAY, AUGUST, 6, 1925

This Week By Arthur Brisbane TRIASSIC ROCKS. LUTHER, CALVIN, BRYAN. SAFETY IN THE AIR.

NOT TO WORRY.

The Reverend Dr. Straton wants the law against teaching evolution introduced into New York State.

His earnestness may puzzle other Fundamentalists when he says he can prove the evolutionists are wrong, because "Triassic rock" antedates by millions of years the time of man's evolution as described by Darwin.

If the world is only six thousand years old, how can there be rocks millions of years old? In their desire to discredit Darwin, the good Fundamentalist should not forget his own "facts and figures."

Deeply religious men often make mistakes in science. Mr. Watson Davis mentions two instances. Martin Luther condemned savagely "an astrologer who strove to show that the world revolves, not the heavens or the firmament, the sun and the moon. This fool wishes to reverse the entire science of astronomy." But today not Galileo is the fool.

Calvin, quoting the psalm which says "the world also is established that it cannot be moved," added, "who will venture to place the authority of Copernicus above that of the Holy Spirit?"

And the good John Wesley thought the new ideas in astronomy showed a trend toward infidelity. Those were three good Protestants; they all worried about Galileo, as Bryan now worries about Darwin. But religion has survived their worry.

Is flying dangerous? If the pilot uses common sense, it is less dangerous than crossing a crowded streat

In twenty-five months pilots from Mitchel Field have flown 1,827,000 miles, in 31,363 separate flights.

Only THREE have been killed, although pilots have turned endless somersaults and committed much other foolishness in the air. Sixty years hence cautious old ladies will refuse to ride in automobiles or earth trains. They will say, "At my age they are too dangerous. I only fly, and at a safe height."

This "humorous" paragraph is published;

A county editor, having worked hard for thirty years, retired with \$50,000 capital. He explained as

follows: "I attribute my ability to retire with \$50,000 to the fact that I worked very hard and saved every cent—and to the death of an uncle who left me \$49,999.50." quakes, yet nobody says, "I shall not go to Italy." A dozen killed in California, and "vicious publicity" makes of the event a GIGANTIC DISASTER.

Some Wall Street gentlemen organized a little panie based on Santa Barbara's earthquake and now wish they hadn't. They sold short California stocks, oils, rails, etc. But real finance knows that, compared to the total wealth of California, the property destruction in Santa Barbara is like loaing one nail in a nail factory. The stocks "snapped" back again, and the panie promoters had their Lagers pinched.

The New York Times devotes part of its front page to "a third term for Coolidge."

There can't be any Coolidge third term discussion until after the President shall have been reelected in 1928. He has been electrd only once thus far. If, as is probable, he should be re-elected in 1928, that would be his SEC-OND TERM and the right time to begin talking of a THIRD term.

When the start man Para

accusing him of royal ambition, a desire to be king, the people worr d about too long tenure of conce. Having got rid of an English king they didn't want an American king. Washington answered that when he refused to be elected more than

wice.

Third term talk now should be postponed by sensible people until about 1930. Meanwhile, there is plenty of work for the people to do without worrying about distant issues. If the President carried the nation successfully through his FIRST elected term, without serious mistakes or setbacks, he will have rendered a great service to the United States, and the people of his party, not being idiots, will ask him to take charge for four years more.

A great coal strike threatens here, as a similar strike threatens England. Mr. Lewis, leader of coal miners, and owners of mines should think it over carefully. To force a strike, when the people ore willing to pay a fair price for coal based on fair wages, is folly and the intelligence of organized money should find a way to prevent it.

The man responsible for the success of the coal miners' union knows that this is not the best time for strikes, and he will avoid THIS strike, if in any just way it can be done.

Insurance - authorities, that ought to know, deny flatly that cancer is hereditary. Nature protects the unborn child. Study of thousands of cases proves that the disease is not inherited, also it is NOT CONTAGIOUS. Unlike consumption and other diseases, you cannot "catch" cancer from its victim. It is important to have this known.

Missionaries to Africa take a tame menagerie, including chickens, pigs, cattle and goats. As they travel, the missionaries will observe how these interesting animals all represent EVOLUTION. The White Leghorns and Rhode Island Reds come from jungle fowl. Cows are improved sisters of the auroch, the buffalo, or the zebu. The pigs have their relatives scattered from the tapirs in South America to the flerce, Liztoothed wart hog of the jungle, or the hippopotamus. THE SPRINGFIELD NEWS

A GOOD DINNER depends largely on your MEAT COURSE

Ten thousand country editors could testify that there is more truth than humor in that anecdote. The most useful, underpaid and earnest body of men in the nation are the editors of country newspapers.

newspapers. The pathetic fact is that they would be highly prosperous rion if business and advertisers realized the truth that the country newspaper, in proportion to its circulation, IS THE BEST ADVER718-ING MEDIUM IN THE COUN-TRY.

An increase in the price of rubber drives manufacturers to plan for smaller tires. Some man of intelligence will find a way to substitute steel springs for rubber and produce a tire better than a rubber tire.

Mr. and Mrs. Howard Manee, who have nine children, gave a party for those children and their offspring. One hundred and one came to the party. If everybody did as well, if the millions in China raised their gigantic families, for instance, and if plagues and floods stopped killing them, how soon would the earth be overpeopled?

That is the thing NOT to worry about.

"The Lord arranges it so that the trees shall not grow into the heavens." And He has undoubtedly arranged it so that the earth shalf not breed more people than it can support. As the world grows older and its people know more, fewer children are BORN; more of them LIVE,

Those that know California the know that this misfortune of a moment will be wiped away, made up and soon forgotten. It will not check California's growth by as much as an hour.

The Italian earthquake in 1915 killed 19,978, and in 1908 earthquakes in Italy killed 76,482. Italy has volcances in addition to earththe hippoptamus. Everything proves that constant change, or evolution, exists in the animal binglow. Only the blind

Helen 'Wills, National and Olympic singles champion, is going "great guns" again this year and is favored to retarn her title. She is typical American and is a prime favorite with tennis fans.

Our meats are carefully selected from young stock and they will cook quickly, retaining their delicate flavor that is so essential to a good roast or steak.

Our delivery service is prompt and efficient.
