

Confidence By Flo

Eleven Years and He Wont Marry

Dear Miss Flo:—I am a woman past thirty. For the last eleven years I have been giving all of my time to a man whom I expected to marry. Now he tells me that he doesn't wish to be tied up in marriage—that a man is a fool to burden himself with a wife.

Please tell me how I can regain his love. I know that he cared for me at one time. If I go out with any one else he is terribly jealous. For that reason, I think he must still care for me a little. Do you think I can win him back? Jane.

I think, Jane, that you are very foolish to want to regain his love. I don't think it would be worth having. The man to whom you have given the best part of your youth, and all of your love, is very selfish indeed. He doesn't want you badly enough himself to make the sacrifices marriage demands, and he doesn't want anybody else to have you. He finds you a congenial companion, one whom he doesn't have to exert himself to entertain, who will pel around with him as a wife would.

It is the tragedy of women that not even neglect, insult, faithlessness or brutality can kill their affection for the man they love. They insist upon going on, clinging with desperate hands to the man who may be trying to break away. They go on and on, hoping against hope that something will happen that will give them back their lost love. But their prayers are never answered. The miracle never happens. For of all dead things, nothing can be so dead as dead love—nothing can be so hopelessly incapable of becoming once more the vital thing it was.

We do not know why we love. We do not know why this person has some particular appeal for us—why we have a sense of comradeship with certain individuals—why some person fascinates us or why we desire one man or one woman more than

Your Fall Hat--Which Will You Have?

another who may be more worthy in every way. Love cannot be analyzed.

Not many men are cruel enough to deliberately win a girl's love and then throw it away, finding joy in the fact that they are capable of breaking a woman's heart. There are not many husbands who would not remain their wife's eternal lovers if they could.

Look at the matter squarely and see what an unfair deal this man is giving you. Do you think he is worth your tears? It may be that he loves you as much as he is capable of caring for any one—but there can be no hope of happiness in such a one-sided love affair, and the sooner you break it off—shut your door in his face and forget him—the better it will be for you.

That will save your self-respect, and it will leave you young enough to make other ties.

If anything in the world will bring him to the point of proposing marriage that will. If he can no longer have your society without marriage, he may marry you to get it.

Springfield Lumber Company Is Hustling Local Industry

A milling in transit plant, which planes and kiln dries lumber, is the Springfield Lumber company. Two shifts of ten men each are now employed at the plant.

The average work of the kiln is about eight carloads of lumber a month, although the capacity is 250,000 feet per month. The planer averages fifty cars of lumber a month.

Machinery at the plant is run by electricity. The large, high speed planer is capable of handling 50,000 feet in eight hours. A small 'sticker' machine finishes moldings. A rip saw trim saws and resaw make up the other equipment.

This plant has been established here for many years, but was purchased January 1 from the Loud Manufacturing company.

TOMATOES EASIEST OF ALL VEGETABLES TO CAN

The acid that gives tomatoes their appetizing flavor also makes them the easiest of all vegetables to can at home. Like fruits, they can be processed at the temperature of boiling water, whereas corn, beans, and the other nonacid vegetables must be processed under pressure at temperatures higher than 212 degrees F. Even tomatoes, however, can not be put up "any old way." The United States Department of Agriculture gives the following directions for home canning tomatoes, and cautions the housewife to watch every step so that the product will be fine-flavored and wholesome:

Select firm, ripe tomatoes of medium size and uniform shape. Do not use tomatoes which are overripe or parts of which are spotted or decayed. Put into trays or shallow layers in wire baskets and dip in boiling water for about a minute, according to ripeness. Remove and plunge quickly into cold water for an instant. Drain at once and core and peel promptly. Pack into jars or cans as closely as possible. For home use fill with a thick tomato sauce or with the juice of other tomatoes; but if the tomatoes are to be sold under federal regulations add only the juice which drains from them during peeling and trimming. Season with 1 teaspoon of salt per quart. Process quart and pint glass jars for 45 minutes in boiling water and No. 2 and No. 3 tin cans for 35 minutes.

Brief directions and time-tables for the home canning of all fruits and vegetables are given in miscellaneous Circular 24, which can be obtained free from the United States Department of Agriculture, Washington, D. C.

Home for Week-end—Miss Isolene Koster spent the week-end at her home in Albany.

Goes to Salem—W. F. Walker made a short business trip to Salem Tuesday.

Marriage Licenses Granted.

During the past week marriage licenses have been granted to the following by the county clerk: Herbert Earl Stemiér, Portland, and Bertha Larson, Marshfield; W. A. Henderson and Grace Oldham, both of Eugene; Dean F. Woolsey and Phyllis Kester, both of Springfield; Virgil Lee Richardson and Rose Willis, both of Cottage Grove; Albert James Mackey, Marcola, and Cora Hileman, Mabel; Paul Newton Montgomery, Glenn Ferry, and Dorothy Dodds, Bend; Arthur H. Clough, Eugene, and Veda F. Drury, Lowell; Earl Hutchenson and Bernice Loward, both of Eugene; Charles W. Bennett, Noti, and Dorothy Simpson, Elmira.

"Keep your feet dry" says every doctor in laying down health rules. This is the season of the year when sudden changes in the weather subjects one to unusual exposures. Attention to your shoes now is a precaution for health's sake.

Let me put on half soles and rubber heels. I can make your old shoes look and wear like new. I guarantee my work and my prices are low.

Wood Preserving Plant Fast Growing Industry

A fast growing industry of Springfield is the Carbolinum Wood preserving company, which will erect, within the next few months, a new plant on the railroad track north of town. From ten to twelve men will be employed at the new plant.

One hundred poles can be treated in an average day's work at the present plant. Bunches varying in number according to the size of the poles are placed with one end in a big vat. Into this vat there is then pumped enough creosote to treat the poles to the desired height. Steam lines wound about the sides of the vat heat the creosote to the boiling point, and the poles are boiled there from six to forty-two hours, according to the condition of the pole and the specifications of the purchaser.

When the poles are prepared, the creosote is pumped back into reserve tanks until the next batch is ready.

There are two of these vats at the

present plant. One of them is 8x23 feet and 12 feet deep. The other, slightly smaller, is 8x16 and 11 feet deep.

Visiting from Portland—Cecil Schaefer of Portland arrived here Tuesday for a short visit with Melford Allen.

Your Birthday Is it this week?

Sept. 27th—Oct. 3rd

If your birthday is this week, you are fascinating in personality, enthusiastic, impulsive and utterly unselfish, always showing the greatest kindness and consideration in both manner and speech. Your happy, amiable disposition wins for you many warm friends, and your success and advancement in life is likely to be all that could be desired. Your intellectual and spiritual qualities are highly developed, and you are broadminded and liberal in your views. You love order and harmony above all things, and if your surroundings are inharmonious you suffer most acutely. Love of the beautiful in all things is very highly developed in your nature.

When you have faults they are pronounced. You are impatient, impulsive, and apt to form your opinions too quickly. You are egotistical, vain, proud, and place undue value upon the applause and approbation of the multitude. You cannot stand personal criticism, even when you know it is just.

Men born during these dates make excellent mathematicians, salesmen, buyers, and orators, and can
