## SPRINGFIELD AND SHEDD TIE IN ARMISTICE GAME

Playing under weeping skies in several inches of mud, the Springfield and Shedd high school football squads fought a 6 to 6 tie game on the Fifth street grounds here yesterday afternoon. A good-sized Armistice day crowd, huddled under umbrellas and in automobiles, watched the game.

A forward pass from McPherson to Covart in the last five seconds of play saved Springfield from a defeat that oomed throughout the game. A short punt from Hastings boot gave Shedd the ball in Springfield territory early in the game, and before five minutes of play the visitors has scored a touchdown.

## Red Cross First Aid Popular in America As Accidents Gain

The rapidly mounting toll from traffic accidents has brought home to the public the necessity of being prepared to render prompt assistance while awaiting the doctor. During the past year 356 chapters of the American Red Cross were instructing classes in First Aid, and in the same period certificates were issued to 26,601 persons qualified by Red Cross experts.

Many cities throughout the United States are showing interest in securing first aid instruction for their police and fire department personnel, and through the work of local chapters, practical results have been obtained in such cities as Washington, D. C.; Toledo, O.; Boston, Mass.; South Bend and Indianapolis, Ind.; Fort Arthur, Texas and other communities. In co-operation with the State authorities, intensive training in first aid and rescue methods has been given to State police and constabulary members at four State training schools.

Instruction in these subjects in public and private schools, colleges and universities has increased during the year. Attention has been given to training teachers at institutes and summer schools.

The Red Cross first aid railroad car has been in continuous operation throughout the year. It covered 10,340 miles, visiting 137 cities, where 1,200 meetings were conducted by the surgeons, with a total of 146,827 people.

Industries particularly have availed themselves of the instruction afforded by the Red Cross. The Western Electric Company, for example, reports a reduction of the accident rate per 1,000 employees.
