The switchboard at Police Headquarters flashed and a sweet young voice murmured: "Have you lost a policeman?"

"No, why?"

"Well, a bluecoat was seen sauntering along the street and this never happened before in our neighborhood, goo-by!"

IT'S A BIG UNIVERSE. ADVERTISING PAYS. NO 100% MEN OR WOMEN. NON STOP OCEAN TO OCEAN.

Latest scientific statement concerning this universe, in which we are less than microbes, and the earth less than a grain of dust, startles you. Our sun, a million times as big as this earth, is only a speck in what men have called "the universe," which contains endless millions of suns, some a million times bigger than ours. It's hard enough to think of such a universe as that.

And new the wise Dr. Hubble, of Mt. Wilson Observatory, tells the California Institute of Technology that a million "universes" such as ours are visible at horrible distances from the earth.

Examine an atom, and you find a central body around which revolve other bodies as the planets revolve around our sun. These "atoms" revolve around the nucleus billions of times in a second.

Atoms, of which you could have millions in one corner of your eye without noticing them, are small solar systems.

Our sun and its planets constitute one atom in our universe. That universe in turn is one atom in the entire universe. Where in that overwhelming space are the heaven to which we look forward and the other place that we dread?

Leaving this earth in a straight line, traveling at the speed of

light, 186,000 miles a second, it would take you one hundred million years to get beyond the telescopic maze of the universe. No wonder it says in the Bible, "In my Father's house are many mansions."

Washington authorities, by President Coolidge's order, of course, have closed the Mexican border between San Diego and the assorted dives of Tia Juana at 6 p. m. The daylight hours are not the best for dives, and the dive inhabitants are leaving.

Tia Juana owners of gambling houses and similar resorts, a majority of them United States citizens, by the way, petition President Coolidge to cancel his 6 p. m. order. To that President Coolidge will turn a very cold shoulder.

The Compromise

A young married couple argued for months what kind of a vehicle they would buy with their savings. Wifey wanted a sedan, Dearie wanted a roadster. So they compromised and bought a baby carriage.

Good Ole Dollar

With no desire to preen ourselves, stick out our chest or puff throatily in the face of trouble for a sister republic we SHOULD feel a certain amount of pride in the past record and the present performance of our good ole Dollar! Think of the troubles of France when their FRANC bobs about at about 2 fr a nickle!

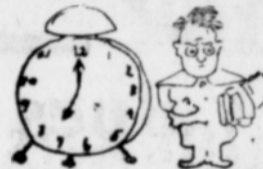

Wouldn't we be in a mess if our good ole dollar was listed at around 17c? Haven't we got a lot to be thankful for even if it is two months to Thanksgiving DAY?

And did you read what Sir Robert Kindersley a British Banker offered for a cure? A hot idea all right. He says:

"If I were to sift my headquarters to America I should become a high priest of extravagance and PREACH THE ADVANTAGE OF SPENDING! For it is only by ECONOMY in Europe and EXTRAVAGANCE in America that a proper adjustment can be made!"

So if all of you folks are agreeable and LIKE Sir Robert's prescription of world prosperity please remember this store when you feel a rush of extravagance coming on.

It's a great world—including the weather.

This "Getting Up" Stuff!

Going to be plenty tough on a lotta you youngsters—these school days! It's easy as anything to get up early to go fishing but mighty different when all the day holds is a lot of problems and study. Soups and Dry Cleaning!

There's a space of some 18 inches between a good bowl of soup and a kid's appetite! In bridging some of this in a hurry SOME of it likes to land on the clothes. Looks bad but not enuf for a dry cleaning. That's where Emerginc or Carbona comes to the rescue! And we sell BOTH of 'em.
