NOTICE TO CREDITORS

NOTICE IS HEREBY GIVEN that the undersigned has been appointed executor of the estate of Charles I. Gorrie, deceased, by the County Court of Lane County, Oregon. All persons having claims against said estate are required to present them with the proper vouchers to the undersigned at the law office of Potter & King, 961 Willamette Street, in Eugene, Oregon, within six months from the date of this notice.

DATED at Eugene, Oregon, this 14th day of October, 1926.

THOMAS C. GORRIE, Executor of the Estate of Charles I. Gorrie, deceased.

He PROVED We All Make Mistakes!

He was the chap who 50 or 60 years ago made a fortune by sticking a small bit of India Rubber on one end of a pencil! The popularity of this particular sort of pencil has lasted right up to NOW! And if you'll observe you'll notice that most pencil rubbers wear out BEFORE the lead end does! Which AGAIN proves we are all prone to error. All of which may or may NOT have a THING to do with the fact that we sure owe a heap of comforts and pleasures to good old RUBBER. Think of the sling shots, sleeve holders, galluses, Congress shoes and garters of the days gone by and the water bottles, gloves, aprons, nipples, sponges and bathing caps of TODAY. And that's not even MENTIONING Automobile Tires! Gosh!

Yessir, Rubber got a very modest start in life—stuck on the end of a pencil but there's no mistake about its importance TODAY—At all!

Tumakes, Cold Feet and Divorces!

They are all factors in the life of our up-to-date Hot Water Bottle such as we sell for \$1.75. Cold Feet to new or even oldish brides are very VERY disillusioning, while Tumakes are NEVER popular. Both can be handled sweetly and purely by a H. W. Bottle.

Protect Yourself in EVERY Way.

Our Baby Sets consisting of Rubber diaper, bib and sheeting give you "complete coverage" against ANYthing the little-darling can think up! The set costs 75c. Are worth \$1.000 at times.

SPECIAL in Rubber Gloves 75c

When you see these particular gloves, you'll understand why we call them "special" at such a price! We were able to get a real price on these and we're passing it on to you—a real bargain!

THE FOOD VALUE OF PINEAPPLE

| | |
|-----------------------------|------|
| FOOD VALUE OF PINEAPPLE | |
| WATER | 76.3 |
| PROTEIN | 4 |
| FAT | 3 |
| TOTAL CARBOHYDRATES | 9.7 |
| CRUDE FIBER | 4 |
| ASH | 3 |
| FUEL VALUE PER LB. CALORIES | 200 |

AS pineapple is being produced in large quantities in the Hawaiian Islands and is gaining a prominent place on the American bill of fare, it is attracting the attention of food specialists, scientists and doctors. In fact, it is greatly to the credit of our colleges and universities today that they maintain a department where the food value of any product is tested, and where the most careful experimental work is carried on with any food that the American people like to eat.

Such experiments have been performed on Hawaiian pineapple, and the following interesting figures have resulted:

Moisture, sugars, protein, crude fiber, mineral matter, and fruit acids in the order named are found in canned pineapple. Naturally the largest percentage of this juicy fruit is the moisture.

Since the vitamin content of any food is regarded of great importance in arriving at a judgment of its dietary value, various experiments on rats and guinea pigs are performed to determine this point.

These experiments have proved beyond question that the pineapple is an unusually high rank all around source of vitamins. This applies to both the canned pineapple and the fresh, just after it has been picked at the right stage of ripeness.

Thus the American housewife is justified in her belief that canned pineapple is an article of diet of substantial food value and is not to be regarded as a luxury of pleasing flavor only!
