Home on Furlough—Will Riley, son of J. M. Blakely, is home on a furlough from the navy. He came down Saturday from Bremerton, Washington.

EMPLOYMENT HOLDS AT HIGH POINT, REPORT

Portland, Oct. 28.—Employment in the Pacific Northwest is holding at a higher point than is usual at this time of year, according to the 4L employment service letter. Logging both east and west of the Cascades, is well into the fall stride, and there is a much greater amount of general construction work being done than during October last year.

Fir sawmills are operating on schedules that have held since mid-summer. The pine sawmill industry is gradually tapering off for the season.

Apple-picking and potato digging are nearly finished in most districts. Calls for farm labor have been few.

A report from Grays Harbor states that one large logging concern closed down two sides last week, but that other camps in the districts were running with normal-sized crews.

Tacoma reports a small surplus of common labor, low turnover and high average employment.

Seattle and North Puget Sound logging is very active, reports state, and there is no or little surplus of experienced loggers.

Spokane reports less unemployment at this time than is usual in October. Jobs there are not plentiful, and neither is there a great number of men seeking work.

WIVES BIGGEST BUYER OF MUSICAL INSTRUMENTS

Elkhart, Ind., Oct. — Sixty per cent of musical instruments sold to women are purchased by housewives. It is revealed in a survey made by the Conn Music Center here. The survey was made through music instrument dealers in twenty cities, and covered 320 actual transactions.

One out of every ten instruments sold were purchased by women, and their preference for instruments were very much along the lines favored by the men, according to the survey. Of the total number of transactions, 52 per cent involved the purchase of a saxophone, 16 per cent of a trumpet, and 9 percent that of a trombone.

That youth will be served, especially in music, was well illustrated in the age of the purchasers. Fully 34 percent of those purchasing instruments were under 21 years of age, while 19 percent were between the ages of 21 and 25, and 21 percent between the ages of 25 and 30, and only 26 percent of all transactions involved persons of 30 years and over.

YOUNGEST STUDENT IS FIFTEEN YEARS OLD

UNIVERSITY OF OREGON, Eugene, Ore., Oct. 28 —(Special)—The youngest freshman in the University is Jennings Mathers, of Vancouver, B. C., who is 15 years, eight months and seven days old, according to an announcement today of Carlton E. Spencer, registrar.

Mathers, who is majoring in pre-medicine, attributed the fact that he finished public school in six years and high school in three to the greater amount of studying demanded of students in Canadian schools. The United States, Mathers believes, has the best universities however, which is the reason he came to Eugene.

Visitor on Monday—Visiting here Monday were Mr. and Mrs. C. R. Manning of Route 1.

Here From Wendling—Mrs. Mary Greer of Wendling was a visitor in Springfield Sunday.

Back From Trip—Mrs. W. H. Adrian returned to Springfield Saturday after a three-week's trip to Los Angeles. Mrs. Adrian motored south with her father and mother, Mr. and Mrs. Scott of Salem. Relatives were visited in the southern city.

From Grove—Mrs. Carl Estep of Cottage Grove was in town Sunday.

Ed Howe Here—Ed Howe, operator of the power plant at Waltherville, was a visitor here Saturday night. Howe saw the Oregon-Stanford football game, and later met his sister in Eugene. She is teaching school in Seattle.

Here After Long Trip—Arthur Vincent and his mother, Mrs. S. R. Vincent, of Tigard, were visitors at the W. H. Pollard residence early this week. The Vincents are back in Oregon after a 6000 mile automobile trip through the Middle West, South and Southwest. Mrs. Vincent is Dr. Pollard's half sister.

In From Waltherville—Dick Potter of Waltherville was a business visitor here Monday.

Creswell Man Here—Rollie Moon of Creswell was a business visitor here Monday.

Visits Fress Residence—Mrs. Sam Montgomery was a visitor Sunday at the home of her sister, Mrs. Fred Fress of Springfield.

Paul Scott Here—Mr. and Mrs. Paul Scott, of Spokane, former Springfield residents and alumni of the University of Oregon, were here for homecoming and visitor at the home of relatives here. Mrs. Scott was Frances Bartlett, daughter of Mr. and Mrs. William Bartlett of this city.

Mrs. Stoddard In—Mrs. M. B. Stoddard of Waltherville transacted business here Monday.

Wide and shallow Pacific Coast firebox

In the Montag firebox, is incorporated Montag's 40 years of experience in building stoves in which may be used Western fuels with economy and efficiency. Its width allows ample space for hot water coils where wood is used for fuel. Its shallowness brings even a small fire in close contact with the stove top, precluding fuel waste in bringing the fire to cooking heat. The flames spread, too, allowing heat area for placing more cooking utensils directly on the heat.

Oven Thermometers

In line with Montag's progressive policy, all Montag Ranges are now equipped with oven door thermometers, which are true and trustworthy. Thus baking is a matter of knowledge instead of guess work.

Toncan iron oven linings

A special feature of Montag Ranges—Toncan iron resists rust, precluding probability of leaks for heat and smoke. It is particularly smooth and easy to clean. All seams are electrically welded, and the whole oven is so suspended as to give maximum even heat in all parts.

Buffet Shelf

Montag designed the buffet shelf for Western cooks because of its practical cleanliness. It also lends outstanding beauty to the proportions of the whole range. It is a modern thought in full keeping with Montag abreast-of-the-times designs. Buffet shelf or door high closet are optional on all Montag Ranges.

Of finest materials

The materials which go into a Montag are known to be the best because these ranges are built complete, right in the great Montag plant. You get Montag iron castings, long-wearing Montag nickel-plate, and durable Montag enameling. Rust-resisting iron is exclusively used for Montag Range bodies and oven linings.

Reservoir and Coil Installations

Montag ranges may be equipped where desired with either reservoir or coils for hot water supply.

MONTAG
