

**Oregon McNARY - HAUGEN Iowa**  
Famous Farm Relief Pair in National Spotlight

Sen. Charles L. McNary, Oregon and Rep. Gilbert N. Haugen, Iowa, have been joint authors of four different bills since post-war deflation, all of which have aimed at relief of agriculture. Their present bill is the most important legislation of this session, having been jockeyed from defeat last year to passage by House and Senate.

**Brief Resume of Happenings of the Week Collected for Our Readers.**

The Umpqua valley broccoli crop to be harvested in February and March will be about one-third as large as last year, it is estimated by those closely in touch with the situation. The low prices which marked last year's market discouraged many of the growers and the acreage is much less, while there were some losses following planting due to dry weather. It is roughly estimated that there will be from 300 to 350 carloads this year, as compared with almost 1000 cars last season.

For years past no automobile license fee has been charged for entrance to Crater lake national park between the Crater lake seasons, but a mandatory order has just been received from the national parks headquarters that an admittance fee of \$1, the regular season fee, must be charged for each car entering the park for the first time during this year. This entrance fee is good for the remainder of the year. This new rule, it is predicted, will bring to the national park coffers much additional revenue.

Man and lightning played fire-bug together in the national forests of Oregon and Washington last year to the extent of starting 1490 fires, which burned over 241,000 acres of land and caused loss of more than \$1,000,000. Of the 1490 fires, 815 were held under one-quarter acre each, 457 covered more than one-quarter acre and less than 10 acres and 218 covered more than 10 acres. Of the area burned, 93,032 acres were mature or merchantable timber, 82,718 acres were potential forest land, 8517 acres were other types of land.

Demand for lumber showed a big increase the last week, the number of orders booked by 103 mills having increased to 109,920,041 feet from 72,762,539 feet booked in orders by 102 mills the week previous, according to the last weekly report of the West Coast Lumbermen's association. This increase was taken to indicate that Pacific coast lumber industry is rapidly overcoming the seasonal slump in business incidental to the annual holiday season at the end of the old and beginning of the new year. The report also showed that production last week increased to \$7,872,536 feet from 70,988,881 feet the previous week. Shipments increased to \$4,267,947 feet from \$4,041,372 feet the previous week.

Extensive developments will be undertaken in the near future at the Pleasant Creek mine, near Grants Pass, it was announced, with the arrival of T. A. Danaher from Detroit to act as general manager of the property. Mr. Danaher stated that addition of mining machinery would make the mine one of the best producers in Josephine county.

Shell fish along the Oregon coast are virtually free from contamination, a survey just completed by George N. McDaniel, sanitary engineer of the state board of health, in cooperation with Frank R. Shaw, sanitary engineer of the United States public health service, discloses. The survey covered the beaches as far south as Yaquina bay, those south of that point to be inspected later.

With Oak street in front of the Portland police station jammed with spectators, 1291 bottles of choice pre-war liquors were fed into the iron maw of a gigantic rock crusher to come out a mass of whiskey-smelling debris. Thus was "finis" written to the \$18,000 stock of whiskies and gins seized three years ago when Police Inspectors Nutter and Harms raided the home of Walter E. Brown, alleged "society bootlegger."

McKay dam, five miles northwest of Pendleton, is now completed and is being filled with water for irrigation purposes during the spring and summer of 1927. The dam, concrete face of which covers 11 1/2 acres, will furnish irrigation water for more than 10,000 acres of new land in the west end of Umatilla county.
