LOST

Five dollars reward for return alive of large long-haired Orange color male Persian cat. Return to last house on North Fifth street. Mrs. Alma Hidenbour. Apr. 7

The Keystone of Satisfaction

It is efficient eye service. You must have experienced, skilled service first.

The refractive errors of your eyes must be measured first with efficiency born of long experience.

The grinding of the lenses, the selection of the proper mounting to meet your particular needs, and the final adjusting of the glasses on the face, are all operations requiring highly specialized skill. That is the keynote to satisfactory glasses.
