BANKS and the law

Every bank is under the control of federal and state laws. They are subject to examination at all times. Their investments must meet certain definite requirements. There must be no speculation or gambling with bank funds that will jeopardize the safety of the money entrusted to it by the depositor.

All this legal protection is an added precaution to protect you. In this bank the safeguarding of your money is the paramount idea. Without any law you would be safe—thus you are doubly protected. Why not bank here?
