The Temperature Test May Be The Means of Saving a Life

Fall is a season of changeable weather conditions and as a result children are subject to much exposure.

Slight colds and other ills may develop into something serious if not watched.

The best way to determine the true condition of children or adults who show signs of fever, is to take their temperature with a reliable

Fever Thermometer
We handle B-D Thermometers

These instruments have all been tested and are guaranteed to be correct. Every home should have one. They are especially valuable in homes where there are small children.
