Investigate This Modern Marvel Today!

The Westinghouse Automatic Electric Range

Have you ever noticed that women will spare no expense to secure the very latest style hat or shoes, yet they will do themselves and their families the rank injustice of paying absolutely no attention to their cooking equipment? It's strange but true!

In weighing the services rendered by the old-fashioned out-of-date solid fuel range and the up-to-the-minute automatic electric range, the slightly higher cost of the latter repays hundred-fold in work achieved. Instead of WASTING countless amounts of fuel after a meal is cooked the new electric range automatically shuts off the minute its work is done; in other words, you pay only for the actual heat (or current) used for cooking.

If your time is worth anything; if you appreciate comfort, convenience, cleanliness, efficiency and health; if you demand sound value—then most certainly—you will take advantage of this unparalleled offer.
