This Week

OKEH SAYS COOLIDGE... AN EGG FOR BASE RUTH. AN OLD ENGINEER. CHILDREN AND SUNSHINE.

President Coolidge, surveying national conditions, finds them excellent. As regards business and prosperity, Secretary Mellon says there is capital, in abundance, for all new ventures worth while, crops are good and automobiles are expected to set new sales records.

Secretary Hoover reports that our exports are increasing. This year is ahead of the same period last year and our imports have one pleasant feature. We are not paying England the high prices for rubber that we paid last year. You may reply to questions about the business outlook, as follows: Nothing the matter, if business does not become afraid of its own prosperity.

Perry Thomas, one of the oldest, most trustworthy engineers on the New York Central, was soon to retire—as soon as he had saved a little more money. Before the day came a head-on collision ended his life, and as he lay dying in the hospital the old engineer, desiring to free everybody else from blame, told witnesses the accident was his fault. He had run by a block signal in the fog.

This reminds the public how much depends on the railroad engineers. They should be better paid than they are now. And they might well be retired on full pay, without waiting until age dims their sight and dulls their nerves. The public would be willing to pay for it.

At Omaha, Babe Ruth received,

as token of his greatness, an egg laid by Lady Norfolk, champion hen of the world.

It was the 170th egg laid or batted out by that hen in 170 days. Ruth remarked: "A hen's egg by the river's brim, a simple hen's egg was to him, and nothing more," and went on with his batting. It would surprise the jost of America to know that such a hen as Lady Norfolk is more important to the country than all its baseball players.

Reports from Maine, received out here on the Mojave Desert, indicate that voters mean to keep the direct primary system for awhile, at least. Professional politicians will not be able to "deliver" a nomination in pre-arranged conventions. And poor millionaires, determined to be somebody, will have to say the direct primary first, and the election afterward.

Hard on politicians, who have less to sell, and on price buyers that must pay high prices for an uncertainty.

The American Public Health Association, gathered at Cleveland, is told that today's greatest cause of death is heart disease. And repeated infections, such as "common colds," is which so little attention is paid, cause heart disease. The trouble starts often in childhood, with childhood diseases, all of which might be avoided. This should interest parents of the dark ages type who think "the children might as well have measles and such little things first as last and get them over with."

Toronto University proves that sunshine will cure rickets, of which many children die. A German wrote more than 100 years ago, "God may forgive you for not giving to children bread that costs money. But He will not forgive you for depriving them of fresh air and sunlight that cost nothing." To prove that sunshine cures rickets does not mean much, when millions of city children can not have the sunshine.

Power companies worth twenty-three billion dollars don't want the Government to harness the Colorado River. That might mean competition in the power business.

Twenty-three billions is less than \$230 per inhabitant of the United States, less than the price of a small automobile. "Twenty-three billions" sounds big, but 115,000,000 human beings, all interested in Colorado River development, possess power also. The Colorado will be developed and power gentlemen will be glad when it happens. Learned bankers fought the Federal Reserve law, dreading interference with pleasant profits. It has saved them from black panic half a dozen times.

4 L'S TO EXPAND INTO MONTANA AND CALIF.

Portland, Ore., Nov. 10.—Extension of 4L territory to include the states of Montana and California and recommendation that 4L field men be sent into those states to interest employees and employers of the lumber industry in the 4L organization, was voted today by the 4L board of directors at its 18th semi-annual meeting held at the Portland hotel here. The 4L territory hitherto has been confined to Oregon, Washington and Idaho.

Continuation of and further aid to the 4L employees' wood promotion campaign, which was inaugurated by employees a year ago and has been carried on since that time by employee committees, was also voted. George Pearson, general chairman of the committee, reported that the Western Pine Manufacturers associa-

tion and the West Coast Lumber bureau had agreed to aid the work of the 4L employees to further the uses of wood.

The 10th anniversary of the 4L organization occurs in January 1928, and it was voted to accept the invitation of the Tacoma 4L to hold a convention in that city of delegates from all 4L locals. The convention will probably be held sometime in February.

Ain't Got No Will-Power

She could stand it no longer. The man had the effrontery to continue smoking that vile smelling weed, in spite of the black glances she had been throwing his way.

"Sir," she said in a haughty voice, "smoking always makes me ill."

"Then, madam," replied her seat-mate, "take my advice and give it up."

"Almost" Human

"Fellows," 5 year old German shepherd, owned by Jacob Herbert of Detroit, faced a psychology test of Columbia University professors, proving himself "almost" human—and with a mind, in some cases, almost equal that of an 8 year old child.
