

OREGON STATE NEWS OF GENERAL INTEREST

Principal Events of the Week Assembled for Information of Our Readers.

The Hotel Willard at Klamath Falls is to be enlarged by the addition of 34 rooms from an adjoining building.

Fire destroyed the Horton Lumber company mill at Horton, near Junction City, doing damage of thousands of dollars.

The Oakland Oil company is again signing up large acreage in the Sutherlin district in preparation for a resumption of drilling operations at the Leeper Dome.

A person licensed in the state of Oregon to practice chiropractic may also practice physiotherapy, according to a legal opinion handed down by the attorney-general.

The huge task of lining the three great tunnels of the Vale project with concrete is nearing completion. The tunnels will provide short cuts for the main canal of the Vale project.

Probably the largest deer ever seen in Bandon was brought in by S. L. Shumate on his return from a hunting trip to Klamath county. It was a six-point deer and weighed 243 pounds.

The Bly Water company, supplying water to the residents of Bly, in Klamath county, has purchased two more wells from J. C. Edsall, with sufficient ground for a pumping plant, and rights of way for two additional mains.

After securing oil land leases on some 30,000 acres in the Harney valley, an oil company will drill its first well on the Culp ranch, 12 miles west of Crane. It is to be a test well, 12 of which will be drilled in the valley.

Hazards of night driving will be less during the coming winter months if Secretary of State Hoss is successful in his plans to eliminate the "one-eyed" automobile, or cars with only one headlight, from the Oregon highways.

Construction work on the third plant of the Western Lumber company was started on the outskirts of Klamath Falls recently, according to an announcement by Irving E. Kesterson, vice-president and general manager of the company.

President Hoover will be presented with the box of Wasco county apples that won the sweepstakes award at the Pacific International Livestock exposition, it was announced by I. F. Sandoz of The Dalles, who grew and packed the fruit.

The Barbey Packing company, operating a plant at Rainier, has finished the season's pack on beans, having put up about 39,000 cases. A considerable portion of the beans came from the Scappoose delta lands and were of excellent quality.

The late potato crop in Columbia county will be at least 40 per cent short and possibly more, according to reports received by George A. Nelson, county agent. Dry weather of the summer and fall is responsible for the small yield, he stated.

Harvesting of Klamath county's potato crop is in full swing. Shipments are going out at the average rate of 20 cars per day in addition to truck shipments. About 300 cars have been shipped to date. All shipments are going to the California market.

While a large number of fire lookouts in Creter National forest have been dropped, the lookouts at the Dutchman peak and Tallowbox mountain stations and the emergency lookout at Robinson Butte will be kept on duty until general rains come.

The fill is completed in Palmer creek at the west city limits of Dayton on the Dayton-McMinnville highway. The Dayton bridge spanning the Yamhill river at west city limits, while not entirely completed, will be opened to traffic within a few days.

There are 18,000 bales of hops in storage in three Salem warehouses, according to announcement made at Salem. These bales contain approximately 3,600,000 pounds of hops.

With the exception of two major projects, road work in Columbia county for 1929 is about over with practically all of the road funds expended, according to Roadmaster Barney.

The pheasant hunting season in Columbia county, which closed recently, was satisfactory to a majority of the hunters. The birds were plentiful in the lowlands along the river as well as in the uplands. The deer hunting season, however, was a disappointment.

James Wolfe, a fisherman about four miles up A'sea river from Waldport, reports that one night recently 14 tons, mostly silver salmon, were caught by himself and his immediate neighbors. The salmon run this year has so far been the best for a number of years.

Milady's Beauty Secrets

By Helena Rubinstein

Beauty is nature's brag, must be shown in courts, at feasts, and high solemnities. Where most may wonder at its workmanship.—Milton.

Beauty Culture Began When Human Interest in

In order to trace the very first interest manifested by women in the development of personal beauty, one would have to go back to the very beginning of time. From extensive research, I find that there was never a time when people were not interested in beauty culture, although the varying standards of the different ages must naturally have seemed ridiculous to each succeeding generation.

The Atlantians in 2300 B. C. have handed down to later generations the earliest reputed records of the use of cosmetics. The Chinese civilization brought about a pursuit of beauty that almost amounted to religion. One of the manifestations which persisted in later years in China was the custom of binding feminine feet in order to keep them tiny. This seems to us such a cruel practice, and yet the Chinese women never protested, accepting this as a part of the daily routine.

Our very ancient ancestor in America, the pre-historic Indian, thought a misshapen skull the highest form of beauty. Skulls were actually deformed in infancy and despite the danger of such operations, these Indians lived to a ripe old age.

When some people today deplore the modern women's intense interest in personal charm, they are ignoring the fact that this interest in beauty is an inheritance of women which has been handed down to her for thousands and thousands of years. As for a woman's right to be interested in beauty culture, I can only refer you to the Bible—to the "Songs of Solomon" dated 1014 years B. C. "When Jehu was to come to Jesreel, Jesebel heard of it, and she painted her face and tidied her hair and looked out of the window."

Certainly no modern woman can do no better than to follow the sage behavior of Jesebel.

HELENA RUBINSTEIN.

"Dead" Snake is Alive
Colorado Springs, Col., Nov. 21.—A "dead" boa constrictor in a taxidermy shop caused a panic when it came to life as the operators were starting to skin it. The twenty foot snake had been in a private zoo on Cheyenne Mountain, where the temperatures hovers above zero. The constrictor was found frozen stiff, and sent to the taxidermy shop for mounting. The heat of the shop revived the constrictor.

Turkey Crop High—Prices Too
Washington, Nov. 21.—The turkey crop this year is larger by 9 per cent than that of 1928, and most of the

increases are in the Eastern and Southern States. Pennsylvania leads with a 25 per cent increase. 52 per cent of the crop will be ready for Thanksgiving. Turkey prices for Thanksgiving increased from 14.4 cents per pound in 1913 to 39.8 cents per pound in 1927.

CLUB TO HAVE BENEFIT CARD PARTY SATURDAY
The star club of the Cascade chapter of the Eastern Star will hold a benefit card party at the home of Mrs. S. C. Wright Saturday afternoon. Mrs. W. K. Barnell is the general chairman of the committee in charge.

J.C. PENNEY CO.

942 Willamette St., Eugene, Oregon.

Warm Underwear

For Men Who Want Warmth on Cool Days

They're part wool and of a splendid ribbed knit. Made with close fitting ribbed cuffs and ankles. Snug fitting throughout and expertly finished. You'll notice that these are very fine values! Not a bad idea to buy several NOW . . . for colder days.

\$1.49

OREGON AND HAWAII TO PLAY AT PORTLAND

University of Oregon, Eugene, Nov. 21.—The outstanding inter-territorial football game of the year will be played in Portland next Saturday when Oregon and Hawaii meet on Multnomah field. The Rainbows, undefeated this season, should give the Webfoots the hardest battle of the year.

Need of reserves to bolster up the varsity in its next two games, which will be played within a period of five days, is the problem confronting the Oregon coaches at this time. Although the Oregon regulars will be in at the start of the Hawaiian game, it is probable that, providing the Webfoots are on a par with the Islanders, many substitutes will be used.

Two of the outstanding football players in this section of the world will fight it out for honors Saturday. They are Bob Robinson, Oregon halfback, and Rusty Holt, captain of the Rainbows. Holt has galloped past all opposition this season, while Robinson rose to his greatest performance in the Oregon State game in which he scored Oregon's two touchdowns.

Robinson is the leading scorer on the Oregon team with 43 points, and ranks fourth on the Pacific coast for conference scores with 30 points. Robinson, Lendahl and Hal Hutton will be Oregon's chief offensive stars against Hawaii.

AUXILIARY WILL GIVE MEDAL TO BEST STUDENT

A medal for the best all-around boy or girl student at the Springfield high school will be awarded probably sometime in the spring by the American Legion Auxiliary. Mrs. M. B. Huntly will purchase the medal for the Legion ladies and donate it to them.

One of the requirements attached to the awarding of the medal is that it be awarded to the one who writes the best paper on a citizenship topic. The other factors will be considered when making the award, and the manner of selecting the winner will be worked out by W. E. Buell, principal of the high school, during the next week.

She Was a Dog, Anyway

Toronto, Canada, Nov. 21.—This composition by a pupil of foreign parentage is making the Board of Education members chuckle. "I have a pet dog. His name is Nell. My dog can do many tricks. He can stand on his two last feet and beg for eats. He is always by my door when I come home from school. One day my dog made four pups. One was a spaniel, one was a bull and two were hounds. He always stayed by his pups. He was a good mother."

SUNDAY SCHOOL CLASS TO HAVE PARTY FRIDAY

The Sunday school class of Mrs. R. P. Mortensen at the Methodist church will have a party at her home tomorrow evening. All boys and girls who are either freshmen or sophomores in the high school and who have no church home are invited to attend, states Mrs. Mortensen. She also promises a large surprise for the members of her class.

"OH YEAH"

A Comedy thriller based on the Post story "No Brakes"

Queer Machine Built to Clean Sawmill Pond Trash

A group of workmen at the Booth-Kelly Lumber company are working on a machine which is interesting, and at the same time seems to offer a new possibility in the matter of cleaning sediment from mill ponds and other large open bodies of water which gradually fill with sediment and refuse.

The machine which is causing the comment has the outward appearance of a houseboat. To the casual observer it has all the looks of a house floating on a raft and which is trailing behind it a series of sectional rafts which have no covers over them. There is also a long tube leading from the house to the mill race, and two heavy electric wires leading out to the house. One might wonder if the house were some modern home with electric lights and running water. But just take a trip out over the floating logs to the middle of the pond and you will find a house and machinery which weigh several tons, all afloat.

Suction Dredge

The thing is nothing more than a suction dredge which a few employees of the mill have been working on for some time and have finally tried out. But it is a new idea in cleaning mill ponds, and if you watch it working you will soon agree that it seems to be very successful. Of course there are a few minor matters which were not just right and which need alteration or readjustment. A worm gear was ground up recently just because the pressure exerted upon it was much greater than the builders had expected, so now they are attempting to shift the pressure to another part of the equipment.

Operation Explained

The principle of the machine is simple enough, although it is not very easy for the novice to understand how the parts act as they do. Mounted on the floor of the house are two motors, one air compressor and one suction pump. Attached to the suction pump is a large rubber hose, which is dropped to the bottom of the pond, and in a circular core around the mouth of the suction hose there are a series of smaller openings which lead to one central tube connected to the air compressor. The

air is forced through these tubes and they agitate the water and sediment making it possible for the suction pump to draw up the loose particles of dirt, bark, limbs and other debris. The material drawn up by the pump is sucked into a chamber in which a revolving fan grinds all the material to fine particles. These particles are then washed with the continual stream of water which is coming out into the sectional piping towed along the floating raft, and which empties into the mill race, where it is carried into the river.

Large Pump Used

The electric power lines carry current to supply the two motors, one of which is 150 h. p. The pump has a carrying capacity of 2000 gallons per minute, so one can readily understand why the workmen have not been able to carry on much experimental work with their new equipment during the summer months when the river level and the ponds are equally low.

Sediment reaching up from the bottom to within a few feet from the surface have been successfully removed to a depth of seven feet in experimental tests made with the machine.

Hens Lay Eggs on the "Average"

New York, October 31.—Samuel Title, in a report to the Board of Education of the College of the City of New York, says that textbook writers sometimes fail to express themselves in words suitable to the power of their readers, with startling results.

He found one child who thought "Senate Chamber" meant "bedroom," and many who defined the "banks of Newfoundland" as places "where people put money."

"Is it any wonder," he asks, "to find a child explaining the word 'average' as 'the thing a hen lays its eggs on,' since he has always read the expression, 'a hen lays on the average'?"

Veteran Dies at 116

Mexico City, Nov. 21.—Euglio Juarez, a veteran of the war with the United States in 1847, is dead at Toluca at the age of 116.

Kafoury's Three Stores to Serve You — Eugene, Salem, Portland
