Maryland Woman Happy Now—Loses 55 Lbs.

Edith J. Marriott of Baltimore, Md. writes: "Last winter I weighed 200 lbs. and was very much ashamed. I bought a bottle of Kruschen Salts which gave such wonderful results I bought more. After 4 bottles I weigh 145 lbs. and all my friends say 'How slender you've gotten—how did you do it?' I say only 4 words—thanks to Kruschen Salts." A generous bottle of Kruschen Salts that lasts 4 weeks costs but 85 cents at the "Kettel's Drug Store" or any drugstore in America—take one-half teaspoon in a glass of hot water every morning before breakfast—cut out pastry and fatty meats—go light on potatoes, butter, cream and sugar—that will help Kruschen take off your fat. Take Kruschen every morning—it's the little daily dose that does it—if not joyfully satisfied after the first bottle—money back.

USE OF DAIRY PRODUCTS INCREASES THIS YEAR

Milk Consumption Increase Even Greater Than That of Other Agricultural Products

Favorable signs for the beef industry but continuing maladjustments in supply and demand factors in the dairy and sheep industries are seen in figures on the livestock situation released today by the extension service at Oregon State college.

Consumption of dairy products has been good this spring, but the estimated production of milk increased more than use of the products, according to the report. Pasture conditions over the country average poorer than usual and holdover stocks of hay, except in some western states, are the lowest in May since 1919. The new hay crop on the whole is the least promising for many years, except 1928.

The supply of beef in storage is light compared to last year and to the average, the college report points out. Holdings of pork products, except lard, have increased until there is now more on hand than last year and the average at this time of the year. Stocks of lamb are light, but the supply available for market is expected to be ample.

Wool markets are showing a better demand and a slight reduction in the clip in southern hemisphere countries where 70 per cent of the world supply originates.

POULTRY IMPORTS AND STOCKS ARE REDUCED

Farm Flocks Commercial Hatcheries Show Decreases During First Part of Year

A 37 per cent decrease in the imports of poultry products during the past year and much smaller stocks of poultry on hand in the United States are favorable signs for the poultry industry reported by L. R. Brethaupt extension economist at Oregon State college.

Imports of poultry, mostly dressed turkeys from Argentina, fell off sharply in 1930, says the report. The total of poultry and poultry products imported was approximately 2,700,000 pounds, or 37 per cent less than in 1929. Furthermore, the cold storage holdings of turkeys in this country are now only about half as large as last year and the five-year average in May.

"Stocks of other poultry are also much smaller than a year ago and well below average," Brethaupt says. "Holdings of case and frozen eggs combined are slightly less than a year ago, but above average. Egg production in April was quite a bit short of April 1930 but consumption also apparently ran behind. Farm flocks of old hens are now somewhat smaller than at this time in 1930, while the reported output of chicks from commercial hatcheries may be 35 per cent less than last year. Just how many chicks have been hatched on farms is not known."

Independent Lumbermen Rapped For Taking Advantage of Economic Condition

A firm stand against wage cutting was taken by the 4-L board of directors, governing body of the Loyal Legion of Loggers and Lumbermen, Monday when they voted unanimously to hold the present 4-L wage scale where it is. The common labor base is \$3, scaled upward for the various jobs. The board is composed of 12 employees and 12 employers. The meeting was the 25th semi-annual of the group.

In his address to the board W. C. Ruesnitz, 4L president, scored the lumber operators outside the 4L organization for taking advantage of an economic situation and reducing wages to "poverty levels."

"A larger share of the national income must find its way into the hands of the masses who buy commodities," he said. "It is self-defeating for business to produce vast quantities of goods which cannot be bought because of low wages"
