Niagara Falls Drops a Piece of Its "Lip"

Without warning, in the night when nobody was looking, a huge chunk of limestone about 175 feet and 150 feet wide broke off the edge of the American Falls at Niagara and plunged into the gorge below the Falls. This changes the contour of the Falls completely, but without impairing their beauty. The rock is gradually wearing away but this is the largest single break in recorded history. The photograph was taken from Goat Island, looking toward the American side.
