FALL FORAGE CROPS

With harvest completed in most She was apparently in the best parts of the state, many farmers

If one were able at this time to predict the type of winter in store for Oregon, this question might be more easily answered, says George R. Hyslop, chief of farm crops at Oregon State college. In cases A complete dressmaking shop where the winter season is at all equipped to do all kinds of sewing severe, following an unusually dry will be opened in the commercial summer such as this has been, it State bank building next to the is not at all uncommon for conpostoffice Saturday, September 19, siderable quantities of alfalfa to be by Flossie Mathes. A complete line winter-killed, he says, particularly suing year was appointed as folof New York millinery will also be in sections that are normally irrihandled. The new businesswoman gated but have had no late water

The safest way, probably, would be to plan on the normal amount of fall forage crops, Professor Hyslop believes. Among those planted in the fall for hay and silage purposes in western Oregon, he calls attention to the vetches. For sweet ter or slightly sour, Hungarian One leaflet is on renovation of vetch has proved the most adaptclothing and the other on making able, and for very heavy and somewhat acid conditions, hairy vetch is most successful. With any of well to sow a companion crop, and for this purpose common gray winter oats is probably the best with either of the vetches, if it is to be used for hay. For silage, winter barley usually makes the best companion crop, and for real early
